Armenia	K3	Assault rifle	5,45 mm Kalashnikov (5,45x39. 5,45 mm Soviet, Russian, .21 Genghis, M 74) Armenia began to manufacture small arms and ammunition in the early 1990s, primarily due to its need for more weapons in its war against Azerbaijan. The K-3 is an Armenian bullpup assault rifle chambered for 5.45x39mm ammunition with a selective fire system, selecting between semi-automatic mode, burst mode, and full automatic fire mode.	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Armenia	Vahan	Assault rifle	5,45 mm Kalashnikov (5,45x39. 5,45 mm Soviet, Russian, .21 Genghis, M 74) The Vahan is a rifle designed by Armenian inventor Vahan Minasyan. It uses a lever-delayed blowback mechanism similar to the San Cristobal or FAMAS, and is designed for the 5.45x39mm cartridge using standard AK74 magazines. The rifle uses stamped upper and lower assemblies held together by a pin at the front and a button at the rear. Australia - AAA (Australia Automatic Arms)	AAA/Leader Dynamics T2, AAA SAR / SAC Mk 5	Carbine	5,56 NATO (5,56x45. .223 Remington) The Leader Dynamics T2 was produced in Australia as an inexpensive rifle for export, and a later variant with a folding stock was submitted in 1986 to military testing with the intent of replacing the Australian military's FAL rifles. It did well in testing, but not well enough to be adopted. The rifles were available on the civilian market in both Australia and the US for a short time. Australia - Armtech Edenpine, Pup Bushmaster USA	Bushmaster M 17S Bull-	Carbine	5,56 NATO (5,56x45, .223 Remington), The M17s rifle is gas operated weapon that uses short-stroke gas piston, located above the barrel. Locking is achieved by rotary bolt with seven lugs; bolt is hosted in massive Ar-18 -style bolt carrier, which rides on dual guide rods. The charging handle is somewhat unusual as it forms the rear part of the integral carrying handle, and therefore it is fully ambidextrous. The cocking handle slot on the top of receiver is covered by sliding dust cover.	A7 Rounds 30 Barrel 576 Weight 3,72 Lenght 760	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

Australia - Leader Dynamics,	Leader Dynamics T2 Mk V (Mark 5) (Tasmanian Devil, AA Leader SAR)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) The Leader was the brainchild of weapons designer Charles St. George. What was unique about this endeavor was that Australia had never designed or manufactured its own commercial gas operated semi-automatic rifle. The Australian Army at the time used the L1A1(FN FAL), made at the Government Lithgow Small Arms Factory, and significant quantities of M16A1 rifles. Australia - Lightgow	Lithgow L1A1 SLR	Rifle	7,62 mm NATO (7,62x51, .308 Winchester), Many Australian soldiers used the SLR rifle during the Vietnam War. Many Australian soldiers preferred the larger calibre weapon over the American M16 because they felt they could trust the NATO 7.62 round to kill an enemy soldier outright. Australian jungle warfare tactics during the Vietnam War were far more conservative than those employed by U.S. troops, and often determined by the strengths and limitations of the SLR and its heavy ammunition load. The SLR was semi-automatic only, unless battlefield modifications were made.	A7 Rounds 20 Barrel Weight Lenght	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Australia - Lithgow Arsenal	Lithgow L2A1	Machine gun	7,62 mm NATO (7,62x51, .308 Winchester) Unique 30 round magazines were developed for the L2A1 rifles. These 30-round magazines were essentially a lengthened version of the standard 20-round L1A1 magazines, perfectly straight in design. Curved 30-round L4A1 magazines from the 7.62 NATO caliber Bren Gun are interchangeable with the 30-round L2A1 magazines, however they reputedly have feeding difficulties due to the additional friction from the curved design as they must be inserted "upside down" in the L2A1 FAL. Australia - Non Volatile Technologies	KAL1-B	Rifle	7,62 mm NATO (7,62x51. .308 Winchester), The KAL1 General Purpose Infantry Rifle (KAL1 GPIR) was an Australian bullpup rifle designed in the 1970s for jungle warfare following complaints about the weight and length of the L1A1 SLR rifles then in service with the Australian Army. The design never entered service however, with the bullpup configured, optically sighted 5.56-mm F-88 Austeyr selected instead, entering service in 1989	A7	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Australia - Omark/Sporting Arms	Omark Sportco Mod. 71S	Carbine	.22 LR (5,6x15 .22 lfb) The 71S is of conventional construction, with a distinctive squared fore-end. Construction was kept simple, with most metal parts made of stamped steel and so-so quality of wood. The receiver is grooved for a scope mount. The Sportco 71S was uses as a training rifle for a short time by the British military as the L-29A1 and L-29A2, but these were quickly replaced by the Cadet model of the L-85. Austria - Mannlicher	Mannlicher 1900 (1896)	Carbine	7,65x53 Mauser (7,65 mm Argentine, Belgian, Turkish. 7,8x53 Czech) Very rare carbine. Mannlicher 1896. Presented in 1900, this rifle was an extrapolation of the gun Mannlicher model 1896. It is equipped with a charger in quincunx of 6 cartridges of 7,65 mm mauser and functions by short recoil of the gun. Its diffusion was restricted with less than 1.000 specimens, only the Bulgarian army had ordered some specimens for its aviators. On the model presented, the broad serrated roller is a modification to separate the stick quickly. Austria - Steyr	Steyr IWS2000 (Infantry Weapon System, AMR5075)	Rifle	15,2 mm Steyr AMR (15,2x169), 14,5 mm The development of this interesting weapon began in mid-1980s, when Austrian company Steyr-Mannlicher AG decided to develop a long-range anti-materiel rifle (AMR) - a modern equivalent of the WW2-era antitank rifles. Main targets for AMR are light armoured vehicles, helicopters, installations such as radar cabins, missile launchers, fuel tanks etc. To achieve desired effective range of at least 1000 meters, Steyr engineers first decided to use APDS (armour piercing, discarding sabot), or sub-caliber, ammunition. Austro Hungary - Steyr	Steyr Schwarzlose M 1907/12 (M 07/12), Schwarzlose MachinenGewehr M07/12	Machine gun Blowback operated	8 mm Austrian Service (8x50 R, Austrian- Mannlicher), 6,5 mm Mannlicher Schoenauer (6,5x53,7 mm, 6,5 mm Greek Mannlicher 6,5x55) 8x56 R Solothurn (8 mm Austrian Mannlicher Steyr, Hungarian Mannlicher, Bulgarian Mannlicher)	A2 Rounds 250 belt Barrel 560 Weight 42 Lenght 1066	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Austro Hungary - Steyr	Steyr Schwarzlose M 1908, M 08, M 08/13, M 08/15	Machine gun Blowback operated	6,5x54 Mannlicher- Schoenauer (6,5x53 R . 256 MSch) The Schwarzlose uses a toggle lock that looks at a glance similar to a Maxim or Luger lock, except that this toggle does not act to lock the bolt. Instead, the toggle must be broken and folded before the bolt can travel rearward, thus delaying it for a moment. This delay is long enough to allow chamber pressure to drop to a safe level (assuming everything is done right). This does require use of ammunition with a specific pressure curve,	A2 Rounds 215 or 250 roun belt Barrel Weight 24 Lenght	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Belgium - Browning (FN Herstal)	Browning Swedish Kulsprutegevar Kg m/35 (1935, FN BAR Type D, m/1935)	Machine gun	6,5x55 mm Mauser- Krag Jorgensen (6,5 mm Skan, Mauser, Mauser- Krag- Jorgensen) The major drawback on kg m/21 (and m/30) was the fixed barrel which burned out fast during full automatic fire. To change the barrel of a kg m/21 needed the help of a skilled gunsmith. Fabrique Nationale had solved the problem burned out barrels by making a gun with exchangeable barrels. These LMG are known as FN type D. Sweden bought a small number of these FN BAR type D and they were named Kg m/1935.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Brazil - IMBEL	IMBEL Springfield SAR48 (SAR48 HB - in Israel)	Carbine	7,62 mm NATO (7,62x51, .308 Winchester) The gun's title is an acronym for "Semi Auto Rifle," plus "48," which was the U.S. Army's designation (T48) for the FAL when it was being tested in the early 1950s. SAR 48 - IMBEL produced a semi-automatic version of the FAL for Springfield Armory, Inc. (not to be confused with the US military Springfield Armory), which was marketed in the US as the SAR-48 and SAR-4800	A7	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Brazil - LAPA	LAPA FA03 (Modelo 03)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) The LAPA FA-03 rifle was developed by Nelmo Suzano at Laboratorio de Pesquisa de Armamento Automatico (LAPA) between 1978 and 1983. This lightweight bullpup rifle features a plastic housing and an interesting double action trigger system, but very few rifles were made in mid-1980s, probably from more than 500 in total. Some of the LAPA FA-03 rifles are still used by special police forces of Brazil. Canada - Diemaco (Colt Canada)	Diemaco (Colt Canada) LSW (Danish LSW)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) The Diemaco Light Support Weapon (LSW) features a heavy barrel suitable for sustained fire. The LSW can only be fired on fully-automatic. The LSW has a boxy square handguard with a carrying handle and a vertical foregrip that can be used as a monopod. The LSW was made with no bayonet lug until recently because of the original bipod. A new bipod attaches to the same barrel yoke as the carrying handle and front grip, so current LSWs are made with a bayonet lug	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

Canada - Dominionian Factory	Dominian Huot - Ross	Light machine gun/ Assault rifle	.303 British (7,7x56 R. .303 Lee-Enfield Mk. 7) One drawback was the Huot was fully automatic only, with no provision for semi-automatic fire. The magazine could be emptied in just 3.2 seconds (a drawback shared by the Browning Automatic Rifle), but it could be changed in four seconds, and an empty magazine filled with ammunition in 30 seconds. In addition the Huot functioned just as well upside-down. The Huot did better in some tests than the Lewis. Canada - Winchester Western, Cooley Machine & Arms	Cooley M 64B Winchester Sears 6C(Canada) Mod. 273.528131	Carbine Blowback operated	.22 LR (5,6x15 R. .22 lfb) The Cooley 64B was made from the 1950's to the 1970's and was sold in huge numbers through department stores at discount prices. It was crude and unreliable at best. When it became dirty, it became the jammingest .22 autoloader ever made. Compounding the problem is the fact that it is very difficult to field strip in order to clean. In fact, the only thing harder than taking it apart is putting it back together. Czechoslovakia - Brno	Brno CZ ZK420S (ZK 420-S)	Rifle	7,5 mm Swiss, 7,65 mm Argentine, 7 mm Mauser, 6,5 mm Swedish, 30-06 Springfield. The ZK 420-S was a Czech wartime development very similar to the M1 Garand rifle, produced in 1945. The primary difference was the use of a rotating bolt very similar to what would be used in the Soviet AK-47 several years later. It likely influenced the development of the M14 rifle, though it failed to gain commercial success. China - Arms Factory No. 36	Type 02 (QJG02G) HMG (QJG 02)	Heavy machine gun	14,5 mm KPV (14,5x115 Antitank, Russian Machinegun, Vladimirov, Type 56 M-1941) This weapon is of indigenous design, and it looks somewhat like an enlarged W-85. So far it has been observed only on low-profile, single-gun AA mountings, which also can be used for ground applications. It is believed that QJG 02 heavy machine gun is already in service with some units of PLA. An updated export version of the gun, named QJG 02G, is being promoted by its maker, the Chinese arms factory No.36. China - Norinco	Norinco Type 74	Machine gun	7,62 mm Nagant (7,62x54 R. 7,62 Mosin -Nagant M/91. 7,62 Russian) The 7.62 mm Type 74 is a squad Light Machine Gun (LMG), gas-operated and fed from a drum magazine. It is also possible to use the Type 56 rifle magazine in place of the drum. The mechanism is gas operated, using a piston to actuate a laterally locking bolt in a similar manner to the SG43 machine gun. The gas system has a four-position regulator mounted at the end of the gas cylinder, above the barrel.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds Drum Barrel 528 Weight 6,4 Lenght 1107	
China - Norinco	Norinco Type 77 HMG	Heavy machine gun	12,7 mm Russian (12,7x108. .50 Russian) This weapon had a somewhat unusual (for a machine gun) direct impingement gas operated action, apparently in attempt to save on the weight of the moving parts. Its basic locking system and belt feed were adaptations of the proven DShKM solutions, and the entire gun with a universal tripod weighs some 56 kilograms – less than half that of the Type 54 / DShKM on its mount. China - Poly Technologies	Poly Tech M 06 12,7 Sniper	Rifle	12,7 mm Russian (12,7x108. .50 Russian), This rifle first appeared in Chinese press as 12,7mm M99B, but it also was recently publicized as M06. In official advertising literature, distributed by Poly Technologies Ltd, an export sales organization of the PLA, this rifle is designated as M99B. It appears that M06 rifle, which is slightly longer than M99B and is listed only with one caliber (12,7x108) is a "domestic use" version for PLA or PAP, while shorter and bi-caliber M99B is an export proposition. Croatia - HS Product	HS Product VHS2 (VHS 2)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) The VHS assault rifle is gas operated weapon that uses direct impingement gas system. Barrel locking is achieved by more or less traditional rotating bolt. The gun body is made from impact resistant polymer, and the gun us designed in the bullpup layout. The ejection port is on the right side of the gun only, so firing it from the left shoulder can be problematic to say the least. The charging handle is located at the top of the gun housing, and can be swung to either side to provide ambidextrous handling. The safety / fire selector is located within the trigger guard, in the front of the trigger, and is rotated around the vertical axis. Croatia - RH-Alan	RH-Alan APS95 (APS -95)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) APS 95 is a licensed copy of the Israeli Galil assault rifle (some sources said that it is a copy of the South African Vektor R-4 rifle, but it is, basically, the same Galil). APS 95 differs from Galil mostly in external appearance, having installed a 1.5X optical scope, which also serves as a carrying handle. Handguards and pistol grip also were redesigned. APS 95 is a gas operated, long piston stroke, rotating bolt locked selective fire weapon. Gas system featured a gas cut-off, which is activated to fire rifle grenades. Fire-selector / safety is of Galil type, metallic buttstock is folding to the right side of the gun. Dominica - Cristobal	Cristobal Mod. 2 1962 (.30 Kiraly- Cristobal Carbine)	Assault rifle	.30 Carbine (7,62x33, 30 M 1 Carbine) The Cristobal Model 2 assault rifle / carbine was developed by famous Hungarian small arms designer Pal Kiraly, who after the WW2 left Hungary and settled in the Dominical republic. The Cristobal Model 2 assault rifle / carbine is broadly based on two submachine gun designs - internally it resembles the Hungarian 39M submachine gun (designed by Kiraly), and externally it somehow resembles Italian Beretta M1938, which at the time of M2 development was manufactured under license in Dominicana. Dominica - Cristobal	Critobal Mod. 3	Assault rifle	7,62 mm NATO (7,62x51, .308 Winchester) Király developed the Model 3 in 1961 as a competitor with the Belgian FN-FAL, an assault rifle using the more powerful 7.62X51mm NATO ammo. By 1961 service showed that the Modelo 2 overheated in automatic fire. The improved Modelo 3 (or 'Mk 3') discarded the original wooden hand guard for a perforated sheetmetal fore-end and the gun could accept an FN export-pattern knife bayonet	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

You can change firing rate weil shooting, and after 300 rounds, the water bouils, redy for tea. I will not recomend the wather for drinking because somtimes the soldiers ran out of wather, and used there own natural sorce. The gaskets in the gun , were somtimes greesed with animal greese and that tends to rot over time, so the wather is rarly very tasty. France - Gevarm St Etienne	Gevarm Model A2, A3, A6, A7	Carbine	.22 LR (5,6x15 R. .22 lfb) Sights consisted of tangent leaf with graduations for 25-100 meters and a tube enclosed front sight with 5 interchangeable posts. The A6 was a cheaper model, with no checkering on the stock and a fixed blade for a front sight and a leaf and elevator rear sight. The A7 had similar sights to A3, but no checkering on pistol grip. It also fired from a closed bolt.	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Semi-automatic		Rounds 8 Barrel 21,65" Weight 6 lbs Lenght 41,25"	
France - Gevarm St Etienne	Gevarm Model E1 Take down	Carbine	.22 LR (5,6x15 R. .22 lfb) Gevarm E1 takedown rifle. It is an interesting little gun made around 1969/70 which unusually fires on the open bolt and has a wedge rather than a firing pin, which hits both sides of the bullet reducing the liklihood of mis-fires. The E series are takedown models with a two piece stock, and a flat sided, round back receiver, rather than the round tubular style receiver of the A series guns. France - Gladiator, SIDARME	Gladiator Chauchat (Fusil-Mitrailleur mle 1915 CSRG, FM15)	Machine gun	8x50 R mm French (Lebel Rifle) The gun was partially made of low quality stampings. The workmanship and the quality of materials were below standard. The parts wore out fast and jammings, malfunctions were common. The long slow recoil caused imbalance and shaking of the gun. The large rimmed Lebel cartridge was the cause of feeding problems. In 1917 16,000 FM-15's were supplied to the US Army in France. These were converted to .30-06, which solved the feeding problems, but the more powerful round quickly shook the guns into pieces. France - MAT	MAT (MAS) 1917	Rifle	8 mm Lebel (8x50 R, Lebel Rifle) Introduced for World War I, the French 1917 represents one of the earliest attempts to field a semi-automatic rifle as the standard-issue arm of a national military, following shortly after Mexico's Mondragon and France's own Meunier rifle. In contrast to the Mondragon, which was such an intricate weapon that only the Swiss could handle manufacture, the 1917 is a simpler, more robust weapon, operating on a gas-port driven long-piston action	B4 <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> Rounds Barrel 31,25" Weight Lenght
Value 4 500 USD		Semi- automatic		
France - Perrin & Cie, Paris	Perrin 1870	Rifle	11 mm French Ordnance (11 mm Chamelot & Delvigne Offiziers Revolver M 1873, 1874) As Lefauchaux Perrin proposed on the commercial market a pistol-carbine derived from his handgun. She was devoid of even his extractor wand was secured to a moving ring around the barrel and the sights were limited to a fixed rear sight and a front sight. During war 1870-1871 , it was realized that a military version differed from the first by its longer barrel and the presence of a barrel and bayonet. The frame is in two parts	B4 <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> Rounds 6 Barrel 695 Weight 2,8 Lenght 1145

France - Puteaux	Puteaux Mle 1905	Machine gun	8 mm Lebel (8x50,5 R) The Puteaux Mle 1905 machine gun was developed by French army officers at the Government-owned facility Atelier de Puteaux. The system turned out to be so bad that it was rapidly redesigned into the St.Etienne M1907 machine gun, which, however, still was only barely better than the original. The original Puteaux M1905 machine guns were quickly withdrawn from front line service, but saw some action in French colonies. France - Saint Etienne	Saint-Etienne M 1907	Machine gun	8 mm Lebel (8x50,5 R) The St.Etienne M1907 machine gun was developed circa 1906 by the state-owned arms factory Manufacture d'Armes de Saint-Etienne in a desperate attempt to improve on the miserable Puteaux M1905 machine gun. The problematic Bang-type gas system was replaced by a slightly more conventional system, which used a gas port drilled about the middle of the barrel, and the return spring was placed below the barrel, around the gas piston rod. Still, the "improved" weapon retained the extremely complex and hardly reliable operating and locking system of the Puteaux gun. France, UK	Vickers-Berthier	Light machine gun	.303 British (7,7x56 R, Lee-Enfield Mk. 7) The Vickers-Berthier light machine gun came a long way, being first designed circa 1909 in France by Gen. Andre Berthier. After much development it was tested and even formally adopted by US Army in 1917. Despite the formal adoption, the Berthier gun was never produced in USA, mostly because of lack of manufacturing facilities during the war. Germany - Berlin Lubecker Waffenfabrik	Mauser G41M (Gewehr 41, Mauser 1941)	Carbine	7,92 mm Mauser (8x57 JS, 8x57 IS, 7,92x57 JS, .315 Mauser Rimless, 8 mm Mauser) After the invasion of the Soviet Union, and seeing the effectiveness of the M40 Tokarev, a need became obvious for such a service rifle, which lead to the adoption of the MG41 in 1941. This rifle, chambered for the standard service cartridge, the 8 x 57, was designed by Mauser, and had a most unique gas system. Rather than the usual gas port in the barrel to bleed off gas to function the weapon, the G41 uses gas after it has left the muzzle. Germany - Gustloff Werke	Gustloff VG1-5 Volkssturmgewehr (Home Guards)	Carbine	7,92x33 Kurz (8 mm Kurz. 7,9 mm Infanterie Kurz Patrone. .30" Kurz) During the closing months of the WW2 Hitler tried all possible means to stop Allied advances on all fronts. One of such means was creation of the Volkssturm organization, Hastily trained and usually armed with second-hand or obsolete weapons, the Volkssturm formed the last line of defense of Third Reich. Due to shortage of small arms during late 1944 and early 1945, German industry developed a number of cheap, rude but at least marginally effective weapons, solely intended for Volkssturm use. Germany - Gustloff Werke	Panzerbuchse PzB40 (Gustloff) (Mod. 42, 44)	Anti-tank rifle	7,92x94 Panzerbuchse (German Ant-Tank. 7,9 mm Patrone 318) Gustloff-Werke presented two self-loading AT rifles - model 42 (later known as PzB.40 G) and model 44. Rifle model 42 had 5 different variations. It was gas-operated. Both models, capable only of semi-auto fire, had different mechanisms of locking the barrel. In one case it was wedge locking and in other case it was done by lever. Both models were magazine-feed from 8-round magazine. Magazine receiver was made on the left side of the rifle's body. Germany - Haenel Waffen	Haenel Schmeisser Mkb42H (Maschinenkarabin 42 Haenel Schmeisser) (Mkb 42H)	Assault rifle	7,92x33 Kurz (8 mm Kurz. 7,9 mm Infanterie Kurz Patrone. .30" Kurz) The MKb.42(H) is a gas operated, selective-fire weapon. It uses a long-stroke gas piston, located above the barrel in a long gas tube. The barrel locking is achieved by tipping the rear part of the bolt down into the locking recess, cut in the machined steel insert in the stamped steel receiver. The gun fires from an open bolt at all times, and the only safety is the MP-40-type slot, cut at the rear of the charging handle slot, in which the charging handle can be hooked when the bolt is open. Germany - Heckler & Koch, USA	Heckler & Koch (HK) G36 (HK36)	Assault rifle	4,56x36 XPL Heckler & Koch (4,6 mm CETME, HK) The HK36 rifle fired a 4.6×36 mm round whose bullet has a "spoon point" (German: Löffelspitz) designed by CETME's Dr. Gunther Voss. Low bullet weight and the straight-line layout of the rifle reduced recoil, while the high velocity of the round gave it an almost flat trajectory out to 300 metres (330 yd), which was also the limit of its effective range. Beyond that point, the bullet lost velocity very quickly. Germany - Heckler & Koch, USA	Heckler & Koch (HK) MR556A1	Carbine	5,56 NATO (5,56x45. .223 Remington), A direct descendent of the HK416, the MR556A1 is a semi-automatic rifle developed by Heckler & Koch as a premium level commercial/civilian firearm. Like the HK416, the MR556A1 is a major product improvement of conventional AR-type carbines and rifles. Using the HK- proprietary gas piston system found on the HK416 and G36, the MR556A1 does not introduce propellant gases and carbon fouling back into the rifle's interior, making it the most reliable of any AR-type firearm. Germany - Heckler & Koch, USA	Heckler & Koch (HK) MR556A1	Carbine	5,56 NATO (5,56x45. .223 Remington) A direct descendent of the HK416, the MR556A1 is a semi-automatic rifle developed by Heckler & Koch as a premium level commercial/civilian firearm. Like the HK416, the MR556A1 is a major product improvement of conventional AR-type carbines and rifles. Using the HK- proprietary gas piston system found on the HK416 and G36, the MR556A1 does not introduce propellant gases and carbon fouling back into the rifle's interior, making it the most reliable of any AR-type firearm. Germany - Heckler & Koch, USA	Heckler & Koch (HK) SA80A2 (G36) with grenade launcher AG36	Assault rifle	5,56 NATO (5,56x45, .223 Remington), 40 mm grenades The Heckler und Koch G-36 assault rifle had been born as HK-50 project in early 1990s. The reason behind that project was that the Bundeswehr (the German army), after the cancellation of the G11 and G41 projects, was left with outdated G3 rifle and no modern rifle, compatible with the current NATO standards at hands. So, the famous company Heckler & Koch was set to develop a new assault rifle for the both German army and the export. Germany - Mauser Werke	Mauser 06-08 (1906-08, C06/08)	Rifle	8x57 S Mauser (Target) (7,92x57 S Mauser 1904, IS JS, German Army Rifle 1924) Abandoning both the short- and long-recoil designs, the next iteration of the Mauser Self-loading Rifle came in 1908 with what was essentially an upscaled version of Mauser's C06/08 pistol. The first apparent difference between the Mauser 06/08 Self-loading Rifle and the previous two Mauser self-loaders is the relatively massive magazine size. Opting not for an internal magazine, the 06/08 rifle introduced a 20-round detachable magazine. Germany - Mauser Werke	Mauser M 06 Gerat	Assault rifle	7,92x33 Kurz (8 mm Kurz. 7,9 mm Infanterie Kurz Patrone. .30" Kurz) The retarded-blowback Stg.45(M) were easily distinguishable from the original gas-operated "Gerät 06" rifles by the ribbed handguards of circular cross-section on the former, as opposed to the slab-sided handguards on the latter gun. The Stg.45(M) was a good deal lighter than the Stg.44, and required about 50% less raw materials to make.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Blowback operated		Rounds 10 or 30 Barrel 400	Weight 3,7 Lenght 893
Germany - Mauser Werke	Mauser M 06H Gerat	Assault rifle	7,92x33 Kurz (8 mm Kurz. 7,9 mm Infanterie Kurz Patrone. .30" Kurz) The Gerat 06H was the first fully roller-locker rifle, and the ancestor of all today's roller-locked firearms (most notably the HK91 and clones). The 06H was a development of the Gerat 06, which was roller locked and gas operated. Mauser engineers determined that with special attention paid to part geometry, the gas piston of the Gerat 06 could be left out entirely, and the roller system could function as a delayed blowback action. Germany - Mauser Werke	Assault rifle	7,92x33 Kurz (8 mm Kurz. 7,9 mm Infanterie Kurz Patrone. .30" Kurz) It was decided to produce the cheapest possible deign, with as much stamping and welding used as possible. The original design, called "Gerät 06". The retarded-blowback Stg.45(M) were easily distinguishable from the original gas-operated "Gerät 06" rifles by the ribbed handguards of circular cross-section on the former, as opposed to the slab-sided handguards on the latter gun. The Stg.45(M) was a good deal lighter than the Stg.44, and required about 50% less raw materials	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Germany - Rheinmetall	Rheinmetall MG42 Grossfuss Maschinengewehr 42 (Machine Gun 42, MG1)	Machine gun	7,92 mm Mauser (8x57 JS, 8x57 IS, 7,92x57 JS, .315 Mauser Rimless, 8 mm Mauser) The MG42 (shortened from German: Maschinengewehr 42, or "Machine Gun 42") was a machine gun that was developed for and entered service with Nazi Germany in 1942, during World War II. The 7.92 mm rifle caliber weapon was developed from, and was intended to supplant the MG34 machine gun, though both would continue to be used and manufactured until the end of the war.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Germany - Rheinmetall	Rheinmetall MG42/59 (MG1A2, GPMG - in Italy)	Universal machine gun	7,62 mm NATO (7,62x51, .308 Winchester) The MG42 has one of the highest average rates of fire of any single-barreled light machine gun resulting in a distinct muzzle report. It has a proven record of reliability, durability, simplicity, and ease of operation. The MG42's lineage continued past Nazi Germany's defeat, forming the basis for the nearly identical MG1 (MG 42/59), and subsequently improved into the still very similar MG2, which was in turn followed by the MG3.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Germany - Rheinmetall	Rheinmetall MG45 (MG-45, MG42V)	Machine gun	8x57 J Mauser (7,92x57 Mauser- Mannlicher 1888. 8x57 J. 8x57 I. 8x57 JS Mauser) In 1944, the material shortages of the Third Reich led to the development a newer version, which had a different operation mechanism that used delayed blowback as opposed to roller locking. For this reason, the MG 45 is considered a different type of firearm , as the mechanisms of these two guns are different. First tests were undertaken in June 1944, but development dragged on and eventually only ten were built. Germany - Rheinmetall	Rheinmetall RH70 (RH-70)	Assault rifle	5,56 NATO (5,56x45. .223 Remington) The RH-70 was an experimental Bullpup assault rifle developed in 1970. It was designed to replace the G-3 battle rifle then in service. It was an entry for a possible 5.56 mm replacement of the 7.62 x 51 mm NATO G3 battle rifle. It is interesting to know how close the magazine and the grip are (the space between the rear side of the grip and the magazine curve form somewhat a "Thumbhole"), thus still allowing the entire bolt to be placed in the rear of the weapon, inside the stock	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Hungary - FEG	FEG AMD65 (AMD-65)	Assault rifle	7,62 mm Kalashnikov (7,62x39) The rifle's design is suited for outdoor use as an infantry rifle but can also be used from within the confines of an armored vehicle as a fire support weapon. This is possible due to the side-folding stock of shaft design that makes it more compact. The barrel is also relatively short for the 7.62x39mm cartridge. The 12.6-inch barrel does not require the bulbous muzzle chamber of the AKS-74U but uses a specially designed muzzle brake, which attenuates both muzzle flash and sound.	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Iran - DIO (Defence Industry Organization)	DIO PKM-T80	Machine gun	7,62 mm Nagant (7,62x54 R. 7,62 Mosin -Nagant M/91. 7,62 Russian) The PKM is a gas-operated and light machine gun which is intended for use for regular and partisan war fares. The reasons of extensive usages of this rifle in armed forces are; simple operation, light-weight, high accuracy and efficiency. This machine gun is infantry support gun normally fired from its bipod mount, however it can be installed in tripod and is used in the classic role of a heavy machine gun to provide long-range area fire	A2 <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Iraq	Al Kadesih	Rifle	7,62 mm Nagant (7,62x54 R. 7,62 Mosin -Nagant M/91. 7,62 Russian) This is the Iraqi version of the SVD – sort of. Though it looks like an SVD at first glance, there are several important differences between the Al-Kadesih and the SVD, enough to treat it as a different rifle. The receiver is made fron stamped steel instead of the milled steel of the SVD, and is not as hardy. The bolt carrier has more in common with the Romanian PSL (which the Iraqis also used), and rotates in the opposite direction from that of the SVD	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Israel - IWI (Israel Weapon Industries)	IWI Tavor 7	Assault rifle	7,62 mm NATO (7,62x51. .308 Winchester) The Tavor 7 is in a bullpup configuration, the same as all the other rifles in the family. It uses a short-stroke gas piston system, unlike the two previous rifles, which utilized a long-stroke gas piston system, similar to the Galil and Kalashnikov rifles. This decreases recoil, as there is not as much mass cycling with each shot. The Tavor 7 also has a gas regulator with four positions: regular (R), adverse/extreme (A), suppressed/suppr	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Israel - Sardius Industries, Technical Consulting International - TCI	Sardius M 36 Sniper Weapon System. (M 89SR, Model 89 Sniper Rifle, SWS, TEI)	Sniper carbine	7,62 mm NATO (7,62x51, .308 Winchester) The M89SR was first introduced as the Sardius M36 Sniper Weapon System (SWS) in the 1980s. The rifle is based on the American M14 rifle in bullpup configuration, and uses the same 7.62×51mm NATO ammunition. It was intended to replace the M14, though Sardius were unable to secure financing. Italy	Perino M 1908	Machine gun	6,5 mm Mannlicher Carcano (6,5x52,5, Italian, Paravichini) The Perino Model 1908 was an early machine gun of Italian origin designed earlier in 1901 by Giuseppe Perino, an engineer (Tecnico dell'Artiglieria). Perino's design apparently was the first Italian-designed machine gun, and in its original configuration weighed in at a heavy 27 kg. It was redesigned in 1910 and brought the weight down to 34 pounds (17 kg), which is more in keeping with other machine guns of its class and era. Italy	Villar-Perosa M 1915 Pistole Mitragliatrice M 15	Machine gun	9 mm Glisenti (9x19) The first portable machine gun used in World War I, this weapon consisted of two nickel and steel barreled pistols connected together, and mounted on a biped or directly on a shield. The breech had two openings, the top one to insert a 25 round semilunar [banana] clip and the lower one to eject the spent cartridges. Firing the Italian 9 mm Glisenti pistol round, it was underpowered by the standards of the other nation's 9 mm rounds. Value		Blowback operated		Rounds 25 Barrel 318 Weight 6,25 Lenght 533					
Italy	Villar-Perosa M 1918 OVP	Assault rifle	9 mm Glisenti (9x19) After the war, some of the original Villar-Perosa weapons (which were actually assemblies of two similar guns) were disassembled into halves, and put into rifle type stocks, with addition of the rifle-type triggers. Such conversions were known as Villar Perosa OVP M1918 (when done by Villar Perosa). A slightly improved version of the same design was also produced by Beretta company, and it was known as Beretta M1918. Italy - Beretta	Beretta Olympia (Unione, Sport, Supersport)	Carbine	.22 LR (5,6x15 R. .22 lfb) Olympia .22 LR is a classic target rifle. It was specially built for matches and is generally known as the "Union Model". Peculiar characteristic of this rifle is that it can supply both single shot and semi automatic fire. This is a rare rifle with a unique action as it can be fired either as a bolt action or in a semi-auto mode. It is fired as a bolt action by having the bolt handle in the 'down' position, or in a semi-auto mode by having the bolt handle in the 'up' position.	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Italy - Breda Meccanica Bresciana	Breda 1930, 1931 (Breda Modello 30, 31 Fucile Mitragliatore)	Machine gun	6,5 mm Mannlicher Carcano (6,5x52,5, Italian, Paravichini) and other The Breda Model 30 was the standard Italian light machine gun of World War II, and is a serious contender for “worst machine gun ever”. The Breda 30 suffered from all manner of problems. To begin with, it was far more complicated than necessary. the Breda used a recoil-delayed blowback mechanism, managing to get all the possible downsides of both. The recoil action meant that the barrel moved with each shot, so the sights were mounted on the receiver to keep them fixed. Italy - Breda Meccanica Bresciana	Breda 1937 (Fucile Mitragliatore, M 37)	Heavy machine gun	8x59 Breda MG (8x59 RB, Machine Gun. 8 mm Italian Breda) The Breda Modello 37 was an Italian heavy machine gun, adopted in 1937. It was the standard machine gun for the Italian Army during World War II. The M37 was meant as a replacement for the more troublesome M1930, and it proved by far more effective in combat. It still had many of the same problems like its predecessor. It used a larger cartridge than its rivals, the 8x59mm Breda. One of its drawbacks was that it was fed by 20-round strips,	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Italy - Jager	Jager (Adler) AP61 (AP-61)	Carbine	.22 LR (5,6x15 R. .22 lfb) This is a traditional-styled semiautomatic rimfire rifle. It is a very simple rifle consisting mainly of a cylinder-shaped receiver, Monte Carlo-combed stock, and simple sights (an adjustable leaf rear and a blade front). The weapon is grooved for a telescopic sight. There is also a deluxe variant called the AP-61L,	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Japan	Taisho M 14 (M 1914, Type 03)	Machine gun	6,5x51 SR Arisaka Type 1 M 30 (6,5x50,8. Meiji 30) The first domestically designed Japanese machine gun was the Type 03 Taisho which appeared in 1914. It was somewhat similar to the French Hotchkiss medium machine gun, although General Kijiro Nambu, the designer of the gun, made numerous changes to the feed, fire controls and locking system of the weapon. The ammunition was a semi-rimmed version of the British .303 round (7.7x56R), and the gun was a slight modification of the Type 03 machine gun. The new round obviously increased the capabilities of infantry machine guns, but it also made Army logistics more complicated. Japan - Kyuunana-Shiki Jidouho	Type 97 ATR (Anti-Tank /Anti-Material)	Machine gun (Anti-tank rifle) Gas operated	20x124 Type 97 The Type 97 anti-tank rifle is gas operated, full automatic only weapon. It used two gas pistons located below the barrel. The bolt locking is achieved by vertically sliding locking block, which is installed at the top of the bolt. When in battery, this locking block is forced up by cam surface in the bolt carrier to engage the slot cut in the receiver. After discharge, rearward movement of the gas piston and bolt carrier forces the locking block to fall down and unblock the bolt;	A2 Rounds 7 Barrel 1250 Weight 50 Lenght 2100	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Japan - Miroku,	Miroku Browning SA22 Grade 1 (SA-22, Grade I)	Carbine Semi-automatic	.22 LR (5,6x15 .22 lfb), The SA-22 was one of the last of John M. Brownings designs, and his genius shines through in every feature. The slim, stylish forged steel receiver and slender barrel takes down into two compact units without tools. The SA-22s tasteful engraving and select walnut make it an object of lasting beauty and enjoyment	B4 Rounds 15 Barrel 500 Weight Lenght	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Mexico - Mendoza SA	Mendoza Mod. C-1934 Fusil Ametrellador	Light machine gun	7x57 Mauser (7,1x56,3. 7 mm Mauser. .275 Cervorum, Rigby High Velocity, Bland) The Mendoza C-1934 light machine gun is a gas operated, air cooled weapon with a quick-detachable barrel. It uses a long-stroke gas system with a cup-shaped gas piston, located below the barrel. A manual gas regulator is provided on the front of the gas block. The barrel locking system uses a rotary bolt with eight radial lugs which lock into recesses cut into the receiver. Firing is from an open bolt, and the gun is capable of both semi- and automatic fire,	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Norway - Kongsberg Vapenfabrikk	Kongsberg Brøndby M 1934 Maskinpistol (Brøndbys selvlader M/1934 Faguttrykk)	Assault rifle	6,5x55 mm Mauser- Krag Jorgensen (6,5 mm Skan, Mauser, Mauser- Krag- Jorgensen) The rifle fires from an open bolt, as evidenced by the fixed firing pin and lack of any linkage from the trigger up to the bolt. Instead, the very rear of the bolt has a catch which engages the firing mechanism, so that upon pulling the trigger the bolt is driven forward by the mainspring, strips a round from the magazine into the chamber, the locking block drops into place, and the round fires. Russia	6 mm Unified Machine Gun	Machine gun	6x94 mm The 6 mm Unified machine gun is a gas operated weapon, firing from open bolt in automatic mode only. It has quick-detachable, air cooled barrel, with conventional rotary bolt locking. This gun is belt fed, using specially designed, non-disintegrating proprietary steel belts with open pockets (push-through type). It is fitted with wooden shoulder stock of skeletonized design, pistol grip and folding bipod. Unlike most of Soviet / Russian weapons, it also featured an integral telescope sight,	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Russia	Baryshev AB- 5,45	Assault rifle	5,45 mm Kalashnikov (5,45x39, 5,45 mm Soviet, .21 Genghis, M 74) Anatoly F. Baryshev designed its original delayed-blowback action in early 1960s. His design was very unusual for the time, mostly in the fact that it was a private effort - a thing, rarely encountered in Soviet Union. Nevertheless, Baryshev managed to find some support in the higher ranks of Soviet Army. Several prototypes were built and tested. New action showed its major advance - a significant decrease in felt recoil	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Recoil operated		Rounds 30 Barrel 455 Weight Lenght	
Russia	Baryshev ABV	Assault rifle	5,45 mm Kalashnikov (5,45x39. <u>5,45 mm</u> Soviet, Russian, .21 Genghis, M 74), <u>7,62x39 Kalashnikov</u> (.30 Russian) Baryshev action is a delayed-blowback system which is fired from open bolt only. Bolt group consists of four parts - bolt with tilting head, inertia piece and locking lever. When gun is fired, bolt group is released and goes forward at once, stripping a fresh cartridge from magazine.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

Russia - IZH	IZH Saiga 9	Carbine	9x19 Parabellum (9 mm NATO, Para, Luger, Beretta, Suomi) The new Saiga-9 carbine is a civilian version of the Vityaz-SN submachine gun. The Saiga-9 will be chambered for the 9×19 (aka 9mm Parabellum and 9mm Luger) cartridge. Standard magazine capacity is only 10 rounds, The styling of the original Vityaz-SN will be maintained, and manufacturer Izhmash claims the carbine will also retain the “reliability and ease of use” of the military weapon. There is a Picatinny rail on the receiver cover for mounting a range of optics.	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value 950 USD		Blowback operated		Rounds 10 Barrel 16” Weight 6,4 lbs Lenght 23/31,7”

Russia - KBP Instrument Design Bureau Tula	Baryshev KPB- 12,7	Heavy machine gun	12,7 mm Russian (12,7x108, .50 Russian) Anatoly F. Baryshev designed its original delayed-blowback action in early 1960s. His design was very unusual for the time, mostly in the fact that it was a private effort - a thing, rarely encountered in Soviet Union. Nevertheless, Baryshev managed to find some support in the higher ranks of Soviet Army. Several prototypes were built and tested. New action showed its major advance - a significant decrease in felt recoil, but otherwise it proved to be unreliable under harsh conditions and inaccurate in single shots. Army rejected the design	A2 <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> Rounds Barrel Weight Lenght

Russia - KBP Instrument Design Bureau Tula	MTs19-07M or MTs19-09	Rifle	7,62 mm NATO (7,62x51. .308 Winchester) or 9,3x64 Brenneke (Hunting, Russian Sniper, Russian Brenneke)	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	The trigger mechanism is provided with a set trigger that reduces trigger pull. The bolt can be completely disassembled without using tools. The bore is chrome-lined. The carbines are fitted with an open and a telescopic sights.	Rounds 5 Barrel 600 or 650 Weight 3,3 or 3,6 Lenght 1055 or 1160					
Russia - KBP Instrument Design Bureau Tula	MTs28 (MTs-28)	Combined rifle-shotgun	.22 LR (5,6x15 R. .22 lfb) and 20 Ga	B4, B7	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	The MTs 28 is an O/U semiauto, or, more accurately, two semiautos, one on top of the other. The top barrel is a three-shot .22 rimfire (9mm also available on the MTs 27), and the bottom barrel is a two-shot 20 gauge shotgun which appears to be fed by a box magazine.	Rounds 3 and 2 Barrel Weight Lenght					
Russia - KBP Instrument Design Bureau Tula	MTs554	Carbine	7,62 mm NATO (7,62x51. .308 Winchester)	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	9,3x62 Mauser (.366 Mauser. 9,3x62 R Dornheim Lippstadt Hunting Rifle), 8x57 JRS Mauser (IRS M 88B Hunting, JRS M 88B Hunting. 8 mm JRS Mauser, IRS Mauser), .30-06 NATO Springfield (7,62x63. .30 Browning, Springfield) The carbine design provides for the replacement of the barrels. Reloading of the carbine is made automatically due to the use of the energy of powder gases.	Rounds 3 or 5 Barrel 550 Weight 2,0 -2 ,5 Lenght 1115					
Russia - KBP Instrument Design Bureau Tula	MTs555	Rifle	7,62 mm NATO (7,62x51. .308 Winchester), .22 LR (5,6x15 R. .22 lfb)	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	9,3x62 Mauser (.366 Mauser. 9,3x62 R), 8x57 JRS Mauser (IRS M 88B Hunting, JRS M 88B Hunting. 8 mm JRS Mauser, IRS Mauser), .30-06 NATO Springfield (7,62x63. .30 Browning, Springfield)	Rounds 3 or 5 Barrel 600 Weight 3,5 Lenght 1200					
Russia - KBP Instrument Design Bureau Tula	OSV96, V94 (OCB-96, B-94 in Russian)	Sniper rifle	12,7 mm Russian (12,7x108, .50 Russian)	B4	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	The OSV-96 is a gas operated, rotating bolt semiautomatic rifle. The bolt locks directly to the barrel extension, so it is possible to made a hinge between the barrel and receiver. When not in use, the OSV-96 could be "folded" around this hinge to save the space, since the rifle is quite long.	Rounds 5 Barrel 1000 Weight 12,9 Lenght 1746					
Russia - KBP Instrument Design Bureau Tula	OTs03 SVU (OC03, OTs-03)	Carbine	7,62 mm Nagant (7,62x54 R, 7,62 Mosin -Nagant, 7,62 Russian), 7,62 mm NATO (7,62x51. .308 Winchester)	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	The OTs-03 rifle is based on the Dragunov sniper rifle with bull pup layout that enabled to significantly reduce rifle length by having retained barrel length and similar to the SVD ballistic performance.	Rounds 10 Barrel 620 Weight 6,1 Lenght 980					
Russia - KBP Instrument Design Bureau Tula	OTs44 (Ratler) (OC44, OTs-44)	Rifle	12,7 mm Russian (12,7x108. .50 Russian)	B4	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Russia - Molot	Molot RPK74M (RPK-74M)	Assault rifle	5,45 mm Kalashnikov (5,45x39, 5,45 mm Soviet, Russian, .21 Genghis, M 74) Just as the RPK is the squad machine gun version of the AKM, the RPK-74 is a machine gun version of the AKM-74, firing the same ammunition. The RPKS-74 is a folding-stock version of the weapon. Instead of the prominent muzzle brake used on the AK-74, the machine gun has a short flash supressor. The magazine is longer than that normally used with the AK-74, but the magazines are interchangeable. The RPK-74 has a bipod. Russia - Molot	Molot Vepr 7,62x54 R	Carbine or rifle	7,62 mm Nagant (7,62x54 R. 7,62 Mosin -Nagant M/91. 7,62 Russian) The rifles "Vepr" belong to the semi-auto weapons class. The automatic reloading is effected by means of using the energy of powder gases moved from the bore into the gas chamber while shooting and the energy of the return spring. The bore is locked by turn of the bolt round its axle by two or three rests (depending on a modification) during the lengthwise movement of the bolt carrier. The hammer-type firing mechanism provides shooting by single shots	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Singapore - CIS (Charter Industries)	CIS SR88 (SR-88)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) SR-88 is a conventional, selective-fire, gas operated rifle. It uses long piston stroke action with rotating bolt, gas piston and gas cylinder are cromium-plated. Gas system featured three positions gas regulator - two open positions, for normal and harsh conditions, and one closed, for launching of the rifle grenades. Barrel is equipped with flash hider, which also served as a rifle grenade launcher. Lower receiver is made from aluminium forging, and the upper receiver is made from steel stampings.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Singapore - CIS (Charter Industries)	CIS SR88A (SR-88A)	Asault rifle	5,56 NATO (5,56x45. .223 Remington) The SR-88 assault rifle was developed by Chartered Industries of Singapore in the late 1980s. This rifle, also available in carbine version, with shorter barrel and floding buttstock, have seen limited service with Singapore army and was mostly sold for export. At the present time the production of the SR-88 is terminated and it is being replaced in Singapore army by SAR-21 bullpup assault rifle.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds 20 or 30 Barrel Weight 3,68 Lenght 810/960	
Singapore - CIS (Charter Industries)	CIS SR88A Carbine	Asault rifle	5,56 NATO (5,56x45. .223 Remington) The SR-88A fixes some very minor deficiencies in the SR-88, but for game purposes it is identical to the SR-88. There is also an SR-88A carbine; this version has an abbreviated 11.6-inch barrel and a folding stock as standard. It has no bayonet lug and cannot mount an underbarrel grenade launcher, but can fire rifle grenades. The SR-88A carbine was designed to be a relatively heavy weapo to minimize barrel climb and make it more controllable in automatic fire. Slovakia - VTSU Zahorie AO-SKTC	VTSU SA58MD (SA-58 MD)	Machine gun	7,62x39 Kalashnikov (.30 Russian)	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	Sa-58MD is a modification (upgrading) of a standard assault rifle submachine gun vz. 58 Czechoslovak production. The gun is equipped with an integrated tactical handle dvojnožkou and anatomically shaped gun handle. The barrel is equipped with a compensator stroke, which increases the stability of the weapon when shooting short doses and reduces kickback. The weapon can be equipped with a storage capacity of 75 rounds.	Rounds 75 Barrel 520 Weight 4,55 Length 1087					
Slovakia - VTSU Zahorie AO-SKTC	VTSU SA58MS (SA VZ58 MS) (SA-58 MS)	Assault rifle	7,62x39 Kalashnikov (.30 Russian)	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	The SA Vz.58 is a gas operated, magazine fed, selective fire weapon. It uses more or less conventional short stroke gas piston, located above the barrel. The gas piston has its own return spring. The locking system features a linearly moving bolt (breechblock) with a separate tilting locking piece. The breechblock(bolt) is located under the bolt carrier, and the locking piece is hinged to the bolt and located under it. Gun fires from the closed bolt all times.	Rounds 30 Barrel 390 Weight 3,1 Length 845					
Slovenia - ARES	RES AKB15 (AKB-15)	Assault rifle	7,62 mm Kalashnikov (7,62x39)	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	RES AKB-15 assault rifle is based on the Serbian (ex-Yugoslavian) Zastava M70 assault rifle, which, in turn, is a clone of the Soviet Kalashnikov AKM rifle. AKB-15 uses same receiver and internals (bolt group, trigger group, safety/selector) as its parent weapon. Key modifications include changes to the front and rear trunnions of the receiver and the all-new top cover, machined from aluminum alloy.	Rounds 30 Barrel 405 Weight 3,6 Length 874/798					
South Africa	Reider (Rieder) Automatic Rifle	Assault rifle	.303 British (7,7x56 R. .303 Lee-Enfield Mk. 7)	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated	The Rieder Automatic Rifle was a fully automatic Lee-Enfield SMLE rifle of South African origin. The Rieder device could be installed straight away without the use of tools. A similar weapon of New Zealand origin was the Charlton Automatic Rifle. While the rifle had no select fire capability, single shots could be achieved by releasing the trigger quickly. Alternatively the bolt could be operated manually if the gas vein was closed.	Rounds 10 or 30 Barrel Weight Length 1130					
South Africa - ADL Lyttelton Works, ARMSCOR	ADL (Lyttelton, ARMSCOR) R3 FN FAL Para	Assault rifle	7,62 mm NATO (7,62x51, .308 Winchester)	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Sweden - Carl Gustaf FFV	Carl Gustaf NIVA MX1970	Assault rifle	5,56 NATO (5,56x45. .223 Remington) Made in Sweden by the Carl Gustav works, the XM1970 was a combination of a shoulder fired recoilless gun and assault rifle. The recoilless gun fired a 45mm anti-tank round while the assault rifle fired a 5.56x45 Nato round. The reasoning behind this was simple, while firing a rocket launcher, RPG, or recoilless gun, the user was often vulnerable to infantry attack after discharging his weapon. Sweden - Carl Gustaf, Husqvarna	Carl Gustaf Ljungman AG42 (m/42, Mod. 1942)	Rifle	6,5 mm Mauser (6,5x55, Norwegian Krag) The Automatgevär m/42 (Ag m/42) (outside of Sweden commonly known as the AG42, AG-42 or Ljungman) is a Swedish semi-automatic rifle in limited use by the Swedish Army from 1942 until the 1960s. The Ag m/42 was designed by Erik Eklund of the AB C.J. Ljungmans Verkstäder company of Malmö around 1941, and entered production at the Carl Gustafs Stads Gevärsfaktori in Eskilstuna in 1942. Some 30 000 rifles were manufactured in all for the Swedish Army. Sweden - Interdynamics AB	Interdynamics MKR	Assault rifle	4,5x26 special ammunition Because of the relatively low power of this ammunition, the MKR gun was made using simple blowback system. Rimmed ammunition was fed from semi-circular magazines, located behind the pistol grip, so the overall layout can be classified as bullpup. Ambidextrous charging handle was located at the top of the plastic receiver. Carbine version of the MKR rifle was similar in design, but had shorter barrel. Interdynamics MKR assault rifle remained only in prototype stage.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Sweden - Interdynamics AB	Interdynamics MKS	Assault rifle	5,56 NATO (5,56x45, .223 Remington) The Interdynamics MKS assault rifle was a gas operated selective fired weapon with rotating barrel locking. Gas system featured a gas regulator. The receiver was made from stamped sheet steel, magazine housing served as a pistol grip. The skeletonized buttstock folded to the right side to save the space. The L-shaped flip-up rear sight has two range settings, for 250 and 400 meters. Carbine version of MKS rifle featured shorter barrel, otherwise being similar to rifle version. Switzerland	Maxim MG94 Swiss	Machine gun	7,5 mm Swiss (7,5x55,4. 7,5x55 Schmidt -Rubin M 1911) The small water jacket also makes the MG94 pretty distinctive among Maxim guns. It did reduce the weight of the gun, but this was a tradeoff for reduced cooling capacity. The MG94 was originally made with several very early Maxim features, like the 1889-style crank handle and free-turning roller in the feed block to help bring in the ammunition belt. The crank handle design was upgraded to the “S” style later in Swiss service. Switzerland - Rexim S.A.	Rexim Favor Sniper	Automatic carbine	9 mm Parabellum (9x19 NATO, Para, Luger) The Rexim Favor submachine gun is a simple blowback weapon that fires from closed bolt. It has a separate annular striker which is operated by separate spring of large diameter, that is located around the bolt return spring. Gun fires in single shots or full automatic, thanks to the fire mode selector located above the front of the trigger guard on the right side of the gun. One noticeable feature of the Rexim Favor submachine gun is that its barrel can be easily removed by unscrewing the barrel nut and pulling the barrel forward	A2 <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> Rounds 32 Barrel 13,38 Weight 8,37 lbs Lenght 24,01/34,25"
Switzerland - Rychinger-Spar	Swiss Elder - Rychiger	Rifle	7,5 mm Swiss (7,5x55,4. 7,5x55 Schmidt -Rubin M 1911), .30-06 NATO Springfield (7,62x63. <u>.30</u> Browning, Springfield) The Swiss-designed Rychiger was a promising rifle submitted to US Army Ordnance testing. It was a recoil-operated gun based on the straight-pull Schmidt-Rubin, and had a barrel which recoiled backwards unlocking the bolt. The bolt would then continue to travel rearward under its momentum.	B4 <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> Rounds 10 Barrel Weight Lenght 1149

Switzerland - SIG and W+F,	W+F SIG MG51	Universal machine gun	7,5 mm Swiss (7,5x55,4, 7,5x55 Schmidt -Rubin) The MG 51 is a short-recoil operated, locked breech, air-cooled and automatic only, belt-fed weapon. It uses a modified MG 42 type locking system with a two-piece bolt and dual locking flaps located in the front part of the bolt. These flaps engage the cuts made in the short barrel extension to provide rigid locking. Upon recoil, the flaps are retracted toward the center of the bolt, to unlock it. An additional lever-type bolt accelerator is provided; it is located in receiver	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Switzerland - Solothurn Waffenfabrik	Solothurn S18-1000, S18-1100 (German PzB785) (PzB-785, S-18/100)	Anti-tank rifle	20x180 R Solothurn S18-1000 anti-tank rifle is semi-automatic weapon which uses short recoil principle to operate its action. The barrel is locked to the bolt using rotary nut, attached to the barrel breach. This nut has series of lugs on its inner surface, which engage cuts made on the bolt heads. Upon recoil the nut is forced to rotate and thus unlocks the bolt, allowing it to recoil freely once the barrel recoil is arrested by the buffer. Upon bolt recoil, a spent case is extracted and ejected	B4	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Switzerland - W+F (Waffenfabrik Bern)	W+F Furrer MP43 (Lmg-Pist 43/44) (MP -43)	Assault rifle (submachine gun) Recoil operated	9x19 Parabellum (9 mm NATO, Para, Luger, Beretta, Suomi), The Lmg-Pist 43/44 submachine gun uses short-recoil operated action with locked bolt. It fires from an open bolt (the barrel also is held back when gun is cocked, and it is released only when the trigger is pressed). Barrel locking is achieved by using a modified Maxim-type toggle-lock. Unlocking (breaking of the toggle) is controlled by an additional third link, which connects the rear end of the toggle with the frame. Upon recoil, the toggle opens to the left, therefore receiver has a large window in its left wall, which is also used as the ejection window. UK	Farquhar - Hill	Rifle	.303 British (7,7x56 R. .303 Lee-Enfield Mk. 7) The Farquhar-Hill rifle was a joint development of two British gentlemen, Moubray G. Farquhar and Arthur H. Hill. Their original invention, patented in UK in 1908 and in USA in 1909, was a long-recoil operated rifle with rotary bolt locking. The key feature of this firearm was the fact that recoil energy of the moving barrel was stored in the intermediate spring. Upon discharge, barrel recoiled back and forth while still locked with the bolt	A7 <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> Rounds 19 Barrel 686 Weight 6,6 Lenght 1042

UK - RSAF Enfield	RSAF Enfield EM1 Stanley Thorpe (EM-1)	Assault rifle	.280 British (pre-NATO) (7x43. 7 mm NATO), The EM1, also known as the "Thorpe rifle", was an experimental assault rifle. It was tested against the rival in-house design, the EM2, but although the EM1 was favourably received, the EM2 was selected as the more fully developed design, and one which was easier to produce. It shared its compact bullpup layout and unit magnification optical sight with the EM2, and like that rifle it used the experimental, intermediate powered, but highly efficient .280 British ("two-eight-oh") round,	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds 20 Barrel 24,5" Weight 10,25 lbs Lenght 36"	
UK - RSAF Enfield	RSAF Enfield EM2 Rifle No. 9 Mk 1, (EM-2, Janson Rifle, Nambe)	Assault rifle	.280 British (7x43. 7 mm NATO) The EM-2 rifle is a gas operated, magazine fed, selective fire rifle. It uses gas system with long piston stroke, located above the barrel. The locking system is generally similar to one found in the WW2-period German Gew.43 or in the Soviet Degtyarov DP-27 machine gun (but turned back to front). Bolt locks into the receiver by two flaps, that are pivoted at their rear to extend out of the bolt and into the locking recesses in the receiver walls. Flaps are controlled by the firing pin sleeve, coaxially located inside the hollow bol	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

Ukraine - UkrOboronProm	Malyuk	Assault rifle	7,62 mm Kalashnikov (7,62x39), 5,45 mm Kalashnikov (5,45x39, 5,45 mm Soviet, .21 Genghis) The heart of each Malyuk rifle is a Soviet-era, USSR-made AKM or AK74 receiver with barrel, bolt group and trigger unit, set into the polymer stock of bullpup layout. New forward-located trigger is linked to the trigger group by a long link; standard AK safety/selector is limited to two positions ("semi-auto" and "full-auto"), and safety is provided by a cross-bolt button located above the trigger guard, which locks the trigger when engaged.	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
