USA - ArmaLite	ArmaLite AR15A4	Carbine	6,8 mm Remington SPC (6,8x43), 7,62 mm Kalashnikov (7,62x39) The AR-15 is a lightweight, air-cooled, magazine fed, autoloading, centerfire shoulder-fired rifle. The original ArmaLite/Colt AR-15 was a selective-fire prototype submitted for consideration as a military infantry rifle, which was later adopted as the M16, and is distinguished from later civilian-model AR-15 rifles marketed by Colt Firearms. Currently, AR-15 is a generic term for a civilian semi-automatic rifle similar to the military M16 variants. USA - ArmaLite	ArmaLite M 15 15SPR1LB SPR Model 1 (Special Purpose Rifle 15A4)	Carbine	5,56 NATO (5,56x45. .223 Remington) The SPR Mod 1 is forged, one-piece upper receiver rail system with exclusive detachable side and bottom rails. Each SPR Mod1 comes with three extra rails standard, at no extra cost. Its one-piece construction offers you a continuous optic platform (COP). There is no gap to bridge between receiver and upper rail when you're installing your scope or sights. This one-piece construction also gives the sighting platform extra rigidity. It's a good strong backbone.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Barrett Firearms	Barrett XM500	Carbine	.50 Browning Machine Gun (12,7x99, .50 BMG) The Barrett XM500 is a gas-operated, semi-automatic sniper rifle/anti-materiel rifle. It is fed by a 10-round detachable box magazine situated behind the trigger in bullpup configuration. It is based on the Barrett M82/M107 .50-caliber sniper rifle. It is intended to be a lighter, more compact alternative to the M82. Since the XM500 has a stationary barrel (instead of the recoiling-barrel design of the M82), it will likely have somewhat better accuracy	B4	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Blackstar Arms	Blackstar BSR15 (AR15) (BSR-15)	Carbine	5,56 NATO (5,56x45, .223 Remington) Blackstar Arms, Inc, is a new California company set up to develop, manufacture and market a California legal AR-15 rifle. It never went commercial and all activity seems to have stopped in 2006 when cheaper less customized products became available on the CA compliance market. Fundamentally, the Blackstar rifle is simply a redesigned AR-15 lower receiver in which the trigger has been moved up and back so that a traditional comb stock can be used. USA - Bushmaster Firearms	Bushmaster BAR10 ("The Ghost AR308")	Carbine	7,62 mm NATO (7,62x51. .308 Winchester) The BAR-10 was meant to compete in the .308 market against Armalite's AR-10 series rifles and Springfield Armory's M1A Rifle by offering a .308 rifle that could accept the relatively inexpensive metric and inch pattern FN FAL magazines. In 2005 Bushmaster discontinued the BAR-10 line of rifles. The design has since been licensed to Rock River Arms. USA - Bushmaster Firearms	Bushmaster Gas Piston Rifle	Carbine	5,56 NATO (5,56x45, .223 Remington) The Bushmaster Gas Piston System Rifles bring new levels of reliability to the “with” type rifle platform by eliminating carbon build up, gas leaks and heat within the Upper Receiver. The Gas Piston System operates by tapping gas pressure off the barrel much like the systems found on AK-47s and FALs	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value	1795 USD	Gas operated		Rounds 30 Barrel 16" Weight 6,5 lbs Length	

USA - Bushmaster Firearms	Bushmaster M 17	Carbine	5,56 NATO (5,56x45. .223 Remington) Bushmaster designated new rifle as M17s and produced it in somewhat limited numbers up until 2005, when it was dropped from Bushmaster products line. It must be noted that demise of Bushmaster M17s was caused mostly by general preferences of American gun market, which is rather shy on bullpups; therefore, Bushmaster company decided to concentrate on much better selling rifles, patterned after with-15 / M16 or M4. The M17s is a self-loading rifle, and thus cannot be classified as a true "assault rifle"	A7	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
		Gas operated		Rounds 30 Barrel 546 Weight 3,72 Lenght 760

USA - Calico Light Weapon Systems	Calico Liberty II Tactical (50 Tactical)	Carbine	9 mm Parabellum (9x19 NATO, Para, Luger) The Calico Liberty is a roller-delayed blowback-operated semi-automatic rifle (Liberty II) or pistol (Liberty III) chambered for the 9 mm Para round. These firearms use an unusual 50 or 100-round helical magazine that allow for a large number of rounds in a relatively compact and convenient package. The spent cartridges are discharged in an unusual fashion as well: downward, ahead of the trigger guard. USA - Calico Light Weapon Systems	Calico M 960 SMG	Assault rifle (submachine gun) or Blowback operated	9 mm Parabellum (9x19 NATO, Para, Luger) The Calico submachine guns are somewhat mysterious and quite notorious in both design, concept and appearance. The key properties of Calico firearms were extremely large magazine capacity combined with slim profile and ambidextrous handling. First designs were intended for both Law Enforcement and Military markets (in either semi-auto or selective fired form, in 9mm) and for civilian market (semi-auto only, in pistol or carbine form)	A2, A7 Rounds 50 Barrel 330 Weight 2,17 Lenght 647/835	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
USA - Calico Light Weapon Systems	Calico M 960A (960AS)	Assault rifle (submachine gun) Blowback operated	9 mm Parabellum (9x19 NATO, Para, Luger) The Model 960 is described as the mini sub-machine gun; the barrel is even shorter, leading to a shorter fore-end (though still with a front pistol-grip). As before, the 960-A has a collapsible stock, while the 960-AS has a fixed butt. Finally there is the Model 961-A 'concealable' sub-machine gun, with a short barrel and fore-end without the front pistol-grip and with a collapsible butt.	A2 Rounds 50 or 100 Barrel 330 Weight 2,17 Lenght 647/835	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
USA - Cavalry Arms	Cavalry Arms CAV15 Mark II AR15 Trooper (CAV-15 Mk 2 AR-15)	Carbine Gas operated	9x19 Parabellum (9 mm NATO, Para, Luger), .45 ACP (11,43x23. .45 Automatic Colt Pistol), Basically, the CAV-15 concept is AR-15 rifle/carbine meets Glock. The CAV-15 MKII lower receiver is lighter, stronger, and less-expensive to produce than the Mil-Spec aluminum AR-15/M16 lower. The CAV-15 MK II utilizes Linear Vibration Welding process. CAV-15 MKII AR-15 lower receiver will also allow thicker 9mm and .45 ACP submachine gun mags to be inserted (with a conversion block, of course), for added versatility. USA - Century International Arms (CIA)	Century (CIA) L1A1/ R1A1 Sporter	Carbine	7,62 mm NATO (7,62x51. .308 Winchester) The front sight is a blade/post which is screwed into the gas block. It is usually secured by a small locking screw at the front of the block. Once this screw is loosened, elevation adjustments are made by lowering or raising the post. There is a tool for this purpose but a small pair of pliers will do. The system is designed to allow excess gas generated by the fired cartridge to be vented to the outside of the system. USA - CMMG Inc. CMMG M 4LEP II Piston	Carbine	5,56 NATO (5,56x45. .223 Remington), 6,8 mm Remington SPC (6,8x43) Gas Piston systems operate cleaner then the direct gas impingement operating systems. With the piston system, the propellant gases that are being diverted at the gas block are now vented at the gas block, instead in the operating system of the upper receiver. Since the fouling from the gas system is not being vented in to the action of your firearm, it stays cooler and cleaner. USA - Colt	Colt CMG2 (CMG-2)	Light machine gun	5,56 NATO (5,56x45. .223 Remington) The CMG-2 has a number of pretty interesting features, including a double-sided reversible firing pin and an extractor designed as a permanent fixed feature of the bolt face. It is belt fed, and uses the same links as the Stoner 63, with a 150-round belt held in a drum fixed to the receiver of the gun. Another unusual attribute of the CMG-2 is its use of the rear pistol grip as a charging handle. USA - Colt	Colt M 231 Port Firing (FPW, Firing Port, FPW)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) The M231 Firing Port Weapon (FPW) is an adapted version of the M16 assault rifle for firing from ports on the M2/M3 Bradley AFV. The infantry's normal M16s are too long for use in a "buttoned up" APC, so the FPW was developed to provide a suitable weapon for this role. Designed by the Rock Island Arsenal, the M231 FPW remains in service, although all but the rear two firing ports on the Bradley have been removed. USA - Colt	Colt M 6520 AR15A2 Government Carbine	Carbine	5,56 NATO (5,56x45. .223 Remington) AR15 is a lightweight, air-cooled, magazine fed, autoloading, centerfire shoulder-fired rifle. The original ArmaLite/Colt with-15 was a selective-fire prototype submitted for consideration as a military infantry rifle, which was later adopted as the M16, and is distinguished from later civilian-model with -15 rifles marketed by Colt Firearms. Currently, with-15 is a generic term for a civilian semi-automatic rifle similar to the military M16 variants. USA - Colt	Colt M 656 (M 16A1)	Carbine	5,56 NATO (5,56x45. .223 Remington) The Colt Model 656 M16A1 Special Low Profile had a special upper receiver with no carrying handle. Instead, it had a low-profile iron sight adjustable for windage and a Weaver base for mounting a scope, a precursor to the Colt and Picatinny rails. It also had a hooded front iron sight in addition to the heavy barrel. Both rifles came standard with either a Leatherwood/Realist scope 3 -9x Adjustable Ranging Telescope. USA - Craston Arms	Craston Johnson M 1944E1	Light machine gun	.30-06 Springfield (7,62x63, .300 Browning) The M1944 LMG is short-recoil operated, air-cooled, magazine-fed weapon. The barrel is locked using a rotary bolt with multiple radial lugs that engage the barrel extension. The barrel is enclosed within a short tubular sleeve with cooling slots, and can be quickly removed for replacement if overheated. Selective fire weapon, firing from an open bolt in the automatic mode (for better cooling), and from a closed bolt in the semi-automatic mode (for better accuracy).	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

USA - Craston Arms, Dror in Israel	Craston Johnson M 1941 (Dror)	Light machine gun	.30-06 Springfield (7,62x63, .300 Browning) The Johnson light machine gun is one of the lesser-known US military machine guns of WWII, although it seems to have been very popular with all those who used it in combat. In many ways, the Johnson LMG is similar to the German FG-42, although with more emphasis on full-auto use instead of shoulder rifle use. It fired from a closed bolt in semiauto and from an open bolt in full auto, and had a bipod both effective, light, and easily detachable	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

USA - Double Star	Double Star DSC AR15 Lightweight	Carbine	5,56 NATO (5,56x45. .223 Remington), This weapon is centered on a fluted HBAR 1x9 twist barrel. Flutting helps be increasing the barrels rigidity, while reducing the flex, vibration, and weight. The 6 position DS-4 buttstock offers length options suitable for nearly every shooter and the weapons overall weight makes split-second acquisition a snap. With the superior stopping power of the 5.56 ammo this entry weapon is, in many ways, superior to its 9mm counter parts. USA - DPMS (Panther Arms)	DPMS Panther A2, A3 Lite 16 (RFA3-L16, RFA2-L16, SS-RFA2L16)	Carbine	5,56 NATO (5,56x45, .223 Remington) This carbine earns its name with its 16" light profile barrel, A1 style upper receiver, and six position collapsible stock. Altogether, it weighs in at only 6.5 lbs. The simple A1 upper receiver allows for windage adjustment to the sights, leaving elevation adjustment to the front sight post. The 16" barrel although light, provides plenty of velocity for most sporting and tactical applications. And the collapsible stock makes this carbine very handy and compact.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - DRD Tactical Company	DRD Kivaari Long Range Sniper	Rifle	.338 Lapua Magnum (8,58x71 mm Finnish. .338 LM), DRD “Kivaari” sniper rifle is a gas-operated weapon, using AR-15 style direct impingement gas system and rotary bolt. AR-style receiver is machined from aluminum alloy. Handguard and barrel with gas tube can be quickly removed from the gun for compact storage, carry or maintenance. Charging handle is located on the left side of the receiver and does not move when gun is fired. The “Kivaari” long rage sniper rifle is named after Finnish word which means “rifle”. USA - DS Arms	DSA NP3	Carbine	5,56 NATO (5,56x45. .223 Remington) With a combination of Robar NP3 internals and Duracoat Finishes, DSA has created the most corrosion resistant FAL ever fabricated for mass production. Truly, the FAL in it's finest form. DSA has concluded Robar NP3 treated internals such as bolt and carrier groups actually gain operational reliability and show less wear. The parts become almost completely self lubricating, which improves reliability even under the harshest conditions. USA - Franklin Armory	Franklin V1 Varmint	Rifle	5,56 NATO (5,56x45. .223 Remington), The V1™ is our top of the line varmint rifle. The two-axis adjustable PRS stock allows shooters of all sizes to comfortably shoulder the rifle. The 24" fluted bull barrel has a Salt Bath Nitride finish inside and out to give it a rockwell hardness of 60 and a corrosion resistance 20x greater than chrome lined. For varmint hunters who like to shoot with gloves, the V1™ includes a Magpul MOE trigger guard for enhanced trigger access	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

USA - Franklin Armory	Franklin V3 Varmint	Rifle	5,56 NATO (5,56x45. .223 Remington), 6,5 mm Grendel (6,5x39. 6,5 Green) The V3™ is a heavyweight varmint rifle similar in design to the V4™, with a longer 24" stainless steel bull barrel. It features a lower receiver with a traditional "A2" layout. The A2 stock and grip will feel familiar to anyone who has experience with a standard AR-15 or M-16. The V3™ also has a flat top Picatinny rail capable of accomodating a wide variety of optics. USA - General Dynamics	Gatling GE GAU19/A, GECAL 50 (GAU-19/A)	Machine gun	.50 Browning Machine Gun (12,7x99, .50 BMG) The GECAL 50, officially designated by the United States military as the GAU-19/A, is an electrically-driven Gatling gun. Due to its weight and size, it is often installed on helicopters, ground vehicles, and water vessels. The GAU-19/A is designed for a linkless feed, but can be fed from a standard M9 linked belt if a delinker feeder is used. USA - General Dynamics	General Dynamics (GD) LW50MG	Machine gun	.50 Browning Machine Gun (12,7x99 NATO. .50 BMG) The LW50MG is the new product of the Armament and Technical products branch of the US-based General Dynamics corporation. This weapon is a direct offspring of the marginally successful XM -307 ACSW / XM-312 program, and current plans are to field first production units of the LW50MG in around 2011. The first US military units to get this highly mobile infantry support weapon are Airborne, Mountain and Special Operations (SOCOM) troops. USA - General Dynamics	General Dynamics (GD) U.S. XM806 (LW50)	Machine gun	.50 Browning Machine Gun (12,7x99 NATO. .50 BMG) LW50 is a .50 caliber heavy machine gun spun out from the canceled XM307 and being developed by General Dynamics to augment the M2. The XM806 will weigh about 63 pounds (29 kg) less (49% lighter) and have 60% less recoil than the M2, and have a greater rate of fire than the failed previous attempt to replace the M2, the XM312. The XM806 also has improvements to user safety and is easier to disassemble. General Dynamics received a \$9 million contract for the weapon. It mounted the dart between three plastic sabots in a triangular plastic cartridge. When fired, the sabots were discarded early in small "sub-barrels" while the dart continued down the main barrel. Upon pulling the trigger, all three projectiles were fired at once. Although the rounds were lightweight the weapon itself was not and the weapon was quickly eliminated from the contest as too heavy, not to mention unsafe. USA - Hyde, Inland	Hyde Bendix Hyde Carbine	Carbine	.30 Carbine (7,62x33. .30 US M 1 Carbine. .30 Self-Loading) The Hyde Carbine was a light rifle concept made by Hyde-Inland. The weapon was similar to that of a Thompson SMG but gas operated. Although it performed well, It was too expensive and overengineered for its type for mass production at the time. However, the second model which became the M1 Carbine was accepted for US Service	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds 20 Barrel 15,75" Weight 5,8 lbs Length 33,6"	
USA - Hyde, Inland	Hyde Carbine	Carbine	.30 Carbine (7,62x33. .30 US M 1 Carbine. .30 Self-Loading), The Hyde Carbine was a light rifle concept made by Hyde-Inland. The weapon was similar to that of a Thompson SMG but gas operated. Although it performed well, It was too expensive and overengineered for its type for mass production at the time. Functioning was not as good, disassembly was more difficult, and the barrel was inferior to the original gun.	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds 5 Barrel 15,75" Weight 5,8 lbs Length 33,6"	
USA - Hyde, Inland	Hyde Carbine 1944	Assault rifle (submachine gun)	.30 Carbine (7,62x33. .30 US M 1 Carbine. .30 Self-Loading) The gun is a .30 carbine submachine gun invented by George Hyde. The gun is particularly interesting for its use of a quick-change barrel mechanism obviously copied off the German MG42: The M1944 Hyde Carbine was an attempt by George Hyde to manufacture a light rifle for the US Armed Forces. The overall weapon was based on the Thompson Submachine Gun which Hyde himself designed many of his weapons on. USA - KE Arms	KE Arms KP-15 WWSD (What woulds Stoner Do?)	Carbine	5,56 NATO (5,56x45, .223 Remington) At the core of the design is the new KP-15 monolithic polymer lower receiver from KE Arms. While attempts at polymer lowers have mostly resulted in failure in the past, the KP -15's design has supposedly corrected any strength issues plaguing the material. So far it seems the KP-15 is a great improvement over previous plastic lowers, having survived strenuous full-auto endurance tests. The new lower helps reduce the carbine's overall weight. one of Stoner's primary goals when he designed the AR. USA - Kel-Tec CNC Industries	Kel-Tec SUB2000	Carbine Blowback operated	9 mm Parabellum (9x19 NATO, Para, Luger), .40 Smith & Wesson (10x21, .40 S&W, SW Auto) The SUB-2000 is a self-loading carbine for pistol cartridges. Different versions of the SUB -2000 will accept most modern handgun magazines, see below for a complete list. The SUB-2000 has a greatly extended range compared to a handgun. The superior precision is also very useful against small or partially covered targets at shorter range. The amount of training to master the SUB-2000 is only a fraction of that required for a handgun. USA - Kintrek	Kintrek KBP1 (KBP-1)	Rifle	.22 LR (5,6x15 R. .22 lfb)) The Kintrek KBP-1 is a .22 LR Bullpup semi-automatic rifle. The KBP-1 is the only known model of firearm made by Kintrek, Incorporated. The KBP-1 has a black finish, A-2 sights, and a grip safety. Its main attraction is the "bullpup" design, in which the chamber and barrel are seated in the butt stock under the cheekplate. This design greatly reduces the overall length of the firearm. This feature was uncommon in non-military weapons in 1991. The manufacturer went out of business in 1992	B4 Rounds 17 Barrel 25" Weight 5,8 lbs Lenght 31 1/2"	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

USA - Knight's Armament Company	Knight (KAC) Stoner 86	Light machine gun	5,56 NATO (5,56x45. .223 Remington) The Stoner LMG is a light machine gun system developed by Eugene Stoner and manufactured by Knight's Armament Company (KAC). It is also known as the KAC Stoner 96 LMG. The Stoner LMG is billed by KAC as the lightest 5.56mm machine gun. It weighs 10 pounds with magazine and has a length of 35.25 inches. The Stoner LMG is belt-fed, gas-cooled, and fully automatic; firing at a rate of 550 rounds per minute.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Knight's Armament Company	Knight (KAC) Stoner 96	Machine gun	5,56 NATO (5,56x45. .223 Remington) Stoner / Knight's Model 96 LMG is a further simplification of the Stoner Model 86. Magazine feed option is omitted, and many parts are redesigned for better reliability. Quick detachable barrel is shortened to provide better CQB characteristics and M4 carbine styled collapsible shoulder stock is fitted to the gun. Gun is provided with several Picatinny rails – one at the top of receiver and four more at the forend. USA - Knight's Armament Company	Knight (KAC) Stoner LMG	Light machine gun	5,56 NATO (5,56x45. .223 Remington) The Stoner Light Machine Gun (LMG) is a shining star in the Stoner line-up. It belongs to a class generally lighter than other LMG's and is highly mobile and portable for individual soldiers. Stoner LMG is one of the first belt-fed 5.56mm LMG and as the result, weighs considerably less and conclusively the ultimate compact LMG. The Stoner LMG was developed by Eugene Stoner in the early 80's to rival the FN in Squad Automatic Weapon (SAW) trials. USA - Krebs Custom	Krebs KTR03S (Krebs Tactical Rifle 2003 Saiga) (KTR-03S)	Carbine	7,62x39 Kalashnikov (.30 Russian) KTR-03 in 5.56, started out as a Saiga sporting rifle built at Izhmash in Russia. KTR-03S is designed to be used and used hard. Soon it will be available with a Vltor stock and FN SAW pistolgrip as options. The Krebs Custom KTR-03S is no longer made, now having been replaced by the KTR-08 rifle. USA - Krebs Custom	Krebs KV13 (KV-13)	Carbine	7,62x39 Kalashnikov (.30 Russian), 5,45 mm Kalashnikov (5,45x39. 5,45 mm Soviet, Russian, .21 Genghis, M 74) The VEPR-based KV-13 combines the features we've come to expect on the AK platform with several modern enhancements. The KV-13's sighting system is also different than that of traditional AKs. Its dual-aperture rear peep sight is similar to AR-15 iron sights, has windage adjustments and is mounted at the rear of the receiver for a longer sight radius. USA - Krebs Custom	Krebs RPK14 (RPK-14)	Carbine	7,62x39 Kalashnikov (.30 Russian) The Krebs Custom RPK-14 is the ultimate evolution of the AK rifle. Krebs starts with a standard VEPR AK rifle with a 20" barrel, strips it down, then rebuilds it from the ground up. The gas block is straightened, sights are aligned, all moving parts are fit, updated parts are installed and the rifle is refinished with extremely durable Krebs Kote. The end result is a rifle that is peerless in the industry in terms of fit, finish and overall quality. USA - LaRue Tactical	LaRue Costa Edition	Carbine	5,56 NATO (5,56x45, .223 Remington) The quest for a perfectly-balanced and reliable 5.56 rifle led Chris Costa to LaRue Tactical for a custom "signature series" rifle to bear his name. Costa requested the best of both worlds; the popular and lightweight PredatAR chassis, combined with the accuracy and reliability of an OBR 5.56 barrel. LaRue brought these elements together and provided it with a 14.5" barrel that is pinned and welded with a SureFire Muzzle Brake.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value 2 895 USD		Gas operated		Rounds 30 Barrel 14,5"	Weight 7,9 lbs Lenght 31,75" (folded)
USA - LaRue Tactical	LaRue OBR Tactical (Optimized Battle Rifle)	Carbine	7,62 mm NATO (7,62x51. .308 Winchester) The LaRue OBR (Optimized Battle Rifle) was built from the ground up, using a newly designed upper-receiver platform, combined with a lower, inspired from our successful 5.56 MM lower. Both the upper and lower are CNC-machined from billet, for the optimum fit and consistency. Machined from billet 7075-T6, the receiver components are designed with more material in critical areas to alleviate known issues of weakness in 7.62 platforms and to stiffen the receiver	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value 3 370 USD		Gas operated		Rounds 20 Barrel 16 or 18"	Weight Lenght

USA - LaRue Tactical	LaRue OBR Tactical (Optimized Battle Rifle)	Carbine	5,56 NATO (5,56x45, .223 Remington) The barrel and barrel nut does not touch the handguard at any point, so there is very little heat-transfer to your support hand. Like its 7.62mm sibling, both the upper and lower are CNC-machined from billet 7075-T6, for the optimum fit and consistency...translating into maximum accuracy. Even though this is a complete rifle, the upper will fit to any Mil-Spec AR15/M16 type lower.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value 2 245 USD		Gas operated		Rounds 30 Barrel 12, 16 or 18"	Weight Lenght
USA - LaRue Tactical	LaRue OBR Tactical (Optimized Battle Rifle)	Carbine	5,56 NATO (5,56x45, .223 Remington) The barrel and barrel nut does not touch the handguard at any point, so there is very little heat-transfer to your support hand. Like its 7.62mm sibling, both the upper and lower are CNC-machined from billet 7075-T6, for the optimum fit and consistency...translating into maximum accuracy. USA - LaRue Tactical	LaRue Predat OBR	Carbine	7,62 mm NATO (7,62x51. .308 Winchester), 5,56 NATO (5,56x45, .223 Remington) The PredatOBR takes the highly accurate OBR 7.62 design, and lightens it in every possible way with the least-possible impact to the accuracy that the standard OBR is known for. The most remarkable feature of the PredatOBR is its ability to be completely "broken down" and stored into the supplied Roll-Bag and Tool Box. The PredatOBR handguard has a locking stainless steel QD Lever system on each side.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value 3 370 USD		Gas operated		Rounds 20 Barrel 14,5, 16,1 or 18"	Weight Lenght
USA - LaRue Tactical	LaRue PredatAR	Carbine	7,62 mm NATO (7,62x51. .308 Winchester), The PredatAR™ takes the highly-accurate OBR 7.62 "Heavy" design, and lightens it in every possible way with the least possible impact to the accuracy that the standard OBR is known for. By contouring the barrel, skeletonizing the handguard, lowering and simplifying the upper rail, and using a low-profile gas block, we were able to reduce roughly 2 pounds from the standard OBR 7.62 rifle.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value 2 807 USD		Gas operated		Rounds 20 Barrel 16 or 18"	Weight Lenght

USA - LaRue Tactical	LaRue PredatAR	Carbine	5,56 NATO (5,56x45, .223 Remington) The PredatAR™ takes the highly accurate OBR 5.56 “Lite” design, and lightens it in every possible way with the least possible impact to the accuracy that the standard OBR is known for. By contouring the barrel, skeletonizing the handguard, lowering and simplifying the upper rail, and using a low-profile gas block, we were able to reduce roughly 2 pounds from the standard OBR 5.56 rifle.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Legion Firearms	Legion Saiga SGL20 (AK47)	Carbine	7,62x39 Kalashnikov (.30 Russian), Although the SGL20 may be a very sophisticated Kalashnikov variant, it still is ultimately a very simple rifle, which is much of the ubiquitous design's appeal. Operationally, the SGL20 (like all Kalashnikovs) is a gas-operated, rotating bolt rifle. When a cartridge is fired, gas is bled off the barrel through a port in the gas block. This gas pushes back a large, heavy piston attached to the bolt carrier of the rifle. This rearward movement causes the bolt head to rotate and unlock from the	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Leinad	Leinad Cobray CM11 (CM-11/NINEmm)	Carbine	9x19 Parabellum (9 mm NATO, Para, Luger, Beretta, Suomi), The feed ramp is nothing more than an extension of the sheet metal trigger guard. These things were made with the least amount of machine work possible, every part that can be made from a stamping is. The magazines are polymer. Only the breech block and barrel and barrel nuts are machined. Very cheap but lots of fun, and even more fun since it feeds and shoots cast without hiccups.	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value	300 - 400 USD	Blowback operated		Rounds 10 Barrel 16" Weight Lenght 31"	
USA - Leinad	Leinad Cobray TM11 (TM-11)	Carbine	9x19 Parabellum (9 mm NATO, Para, Luger, Beretta, Suomi), Unlike most M-11s, it has a fixed stock that extends from the butt of the weapon and a finned 16-inch barrel with a Thompson style front grip. It does not have the ability to fire-auto and makes use of the closed bolt method of operation instead of firing from the "open bolt". The end of the barrel is not threaded and the magazine latch system has been replaced with the notorious "ball catch".	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value	350 USD	Blowback operated		Rounds 10 Barrel 16" Weight Lenght	
USA - Les Baer Custom	Las Baer 308 Match	Carbine	7,62 mm NATO (7,62x51. .308 Winchester) Because Les Baer's rifles are all about quality parts and thoughtful extra touches, both the upper and lower receiver are made from premium 7075-T6-51 billet aluminum and completely precision machined. The lower also includes a trigger guard that's machined in. Les Baer's obsession with quality and attention to detail are immediately apparent, due in large part to the LBC bench rest 416R stainless steel barrel with cut rifling	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Les Baer Custom	Lea Baer AR Police Special	Carbine	.264 LBC-AR, 5,56 NATO (5,56x45. .223 Remington), Police Special 16" AR was designed to include every important feature a police officer wants but none of the stuff he doesn't. High performance rifle that could serve as either a patrol carbine or a high energy tactical rifle. For 2012, Les has sweetened the pot even a little more by adding a few additional high demand law enforcement features including a new LBC national match carrier, a six position M-4 style collapsible stock, and a very special LBC flip-up front sight. USA - LRB Arms	LRB Arms M 25	Rifle	7,62 mm NATO (7,62x51, .308 Winchester) The M25 was built as a joint services system, meeting the needs of both Army SF and Navy SEAL sniper teams for a semi-automatic sniper rifle built on the same lines as the match grade M14 and M21 semi-automatic rifles. The M25 is not a replacement for existing bolt-action rifles, such as the Army's M24 and the Marine Corps' M40A3, but rather the M25 is intended to serve as a sniper support weapon for the sniper team observer. USA - LWRC (Leitner Wise Rifle Co)	LWRC REPR (R.E.P. R.) Standard or Sniper (Rapid Engagement Precision Rifle)	Assault rifle	7,62 mm NATO (7,62x51. .308 Winchester) The unique LWRCI™ Rapid Engagement Precision Rifle (R.E.P.R.) is a full spectrum weapon system designed to put devastating 7.62mm NATO rounds on target in a variety of roles. The R.E.P. R. rifle allows a marksman to perform assaulter duty with the 12" barreled upper installed, and quickly switch to a sniper role simply by changing to the 20" barreled upper. The extra upper receiver assembly can be carried in a backpack and takes up less room and weighs less than	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Marcolmar Firearms	CETME-LVS (LV/S)	Assault rifle Gas operated	5,56 NATO (5,56x45, .223 Remington), MarColMar built this faithful reproduction by copying an original CETME SA80 rail mount. We then utilized a medium contour barrel, made from our cold-hammer forged 1-in-7 blank, which is profiled, chambered, and fluted by RCM. The barrel is wider under the handguard to reduce barrel whip and provide greater accuracy. The barrel is then nitrided to provide extreme hardness and durability. USA - Marlin-Rockwell Corp.	Marlin/Rockwell 1917 "Potato Digger"	Machine gun	.30-06 Springfield (7,62x63, .300 Browning) Originally developed as the Model 1895 by John M. Browning, the "Potato Digger" was an early development in gas-operated firearms, using a gas port near the muzzle of the barrel to power a spring loaded lever arm to cycle the action. This arm, which projects down and out from the weapon with significant force during the firing cycle, is the source of the weapon's nickname. Originally manufactured by Colt, the production of the arm was taken over by Marlin Rockwell	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

USA - Olympic Arms (Safari Arms)	Olympic (Safari) Plinker Plus (Plinker Plus 20, Plinker Plus 16)	Carbine	5,56 NATO (5,56x45. .223 Remington), The big twin to the Plinker Plus, this rifle is a throw-back with an A1 rear sight system. Essentially a modernized A1 rifle, meaning it comes with an standard mil-spec lower receiver, A2 buttstock, flash suppressor, and bayonet lug. The receivers are forged and the upper receiver has the forward assist and brass deflector built in. Standard with a 20" barrel, this rifle is ready for action. at a competitive price for the budget shooter, this is the least expensive 20" barreled AR on the market. USA - POF (Patriot Ordnance Factory)	POF Patriot Rouge	Carbine	7,62 mm NATO (7,62x51, .308 Winchester) Project "Rogue" was an exercise to turn the Revolution platform into the lightest .308 semi auto rifle on the market, and to do it without needless "lightening" cuts. All while delivering a rifle at a price point affordable to serious shooters. The result is a sub 6 pound .308 rifle packed with proprietary and patented innovations. Thanks to its ridiculously light weight, never before has a semi auto .308 been a more realistic option to carry in the field. USA - Pratt & Whitney Tool Company, Army Hanyang Arsenal China	General Liu Quing EN (Liu Mk I)	Rifle	8x57 J Mauser (7,92x57 Mauser- Mannlicher 1888. 8x57 J. 8x57 I Tysk Mauser. 8x57 JS Mauser) The General Liu rifle (named for its designer) was China's closest approach to an indigenous self-loading infantry rifle before World War II. Mechanically it used the same principles as the Danish Bang rifle – a muzzle cup captured some of the gases from firing and was pulled forward, moving a cam and lever that cycled the bolt. While in charge of Hanyang Arsenal, General T.E. Liu developed a gas-operated rifle with a muzzle gas trap cap, utilizing a hinged block	B4	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

USA - Remington Arms	Remington Mod. 522 Viper	Carbine	.22 LR (5,6x17 .22 lfb), The model 522 Viper is a semi-automatic rifle chambered for the .22 Long Rifle cartridge. The viper uses mostly polymer in construction; Only the barrel, bolt and a few small parts being steel. Barrel length is 20 inches and weight is 4.5 lbs. Magazine capacity is 10 rounds. Ramline briefly produced 25 round magazines for the Viper, but the rifle's introduction was only months before the 1994 Assault Weapons Ban, and the model 522 was dropped before the ban sunset in 2004. USA - Remington Arms	Remington Mod. 77 Nylon (Mohawk 10C, C10)	Carbine	.22 LR (5,6x15 <u>.22</u> lfb), <u>.22</u> Short (5,6x11. <u>.22</u> Kurz) The last of the Remington Nylon .22s to be introduced was the Nylon 77. This was merely a clip magazine fed version of the Nylon 66 MB introduced in 1970. Its standard removable magazine held 5 rounds and a 10 round accessory magazine was available. Even the standard 5 round magazine projected well below the bottom of the stock, ruining the rifle's sleek look. Priced about the same as the Nylon 66 MB, after two years the Nylon 77 was renamed the Mohawk 10C	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

USA - Remington, CBC - Brazil	Remington Mod. 66 Nylon Apache, Black Diamond (66MB, 66GS, 66SG, 66AB, 66BD)	Rifle	.22 Short (5,6x11. .22 Kurz), .22 Long (5,6x15,1 .22 LR Z, Lang, Zimmer), .22 LR (5,6x15 .22 lfb) Introduced by Remington in 1959, the auto-loading .22 caliber Remington Nylon 66 featured a synthetic stock built from the Dupont material Zytel, a compound similar to Nylon. The largely-synthetic construction meant that the Nylon 66 could operate without any added lubricants. This made it very popular in arctic regions, and indeed there have been many reports of indigenous peoples taking large animals, such as moose, with a .22LR fired from a Nylon 66. USA - Rock Island Arsenal	Rock Island (RIA) M 231 FPW (Firing Port Weapon)	Carbine Gas operated	5,56 NATO (5,56x45, .223 Remington) The M231 Firing Port Weapon (FPW) is an adapted version of the M16 assault rifle for firing from ports on the M2 Bradley. The infantry's normal M16s are too long for use in a "buttoned up" APC, so the FPW was developed to provide a suitable weapon for this role. Designed by the Rock Island Arsenal, the M231 FPW remains in service, although all but the rear two firing ports on the Bradley have been removed. USA - Ruger (Sturm, Ruger & Co)	Ruger SR556 Takedown	Carbine	5,56 NATO (5,56x45. .223 Remington) SR-556 Takedown, it is a variation on the original SR-556 rifle. The main difference is the gun can be taken down quickly for more compact storage or to change calibers. In just a few seconds, the barrel can be swapped out to change from 5.56 NATO to 300 BLK. Since both the magazines and bolt are the same in each caliber, nothing other than the barrel need be changed. The rifles use a piston system instead of a DI-type system.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value 2 199 USD		Gas operated		Rounds 30 Barrel 16,12" Weight 7,6 lbs Lenght	

USA - Ruger (Sturm, Ruger & Co)	Ruger SR556C M 4 (SR-556C)	Carbine	5,56 NATO (5,56x45, .223 Remington) Following the general trend, Ruger, however, developed an improved version of the basic weapon that has many factory-standard features which, otherwise, are considered as expensive aftermarket options. Most important of these features are short-stroke piston-operated gas action (as opposed to original direct impingement gas action of the classic Ar-15 rifles), cold-hammer forged barrel with flash hider, as well as quad-rail forend, folding detachable iron sights and quality 30-round magazines.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value 479 USD		Gas operated		Rounds 30 Barrel 16,12" Weight 7,4 lbs Lenght 31 - 34,25"	
USA - Ruger (Sturm, Ruger & Co)	Ruger SR556CLA (SR-556CLA)	Carbine	5,56 NATO (5,56x45. .223 Remington), SR-556CLA Autoloading Rifle. Features a lightweight, adaptable handguard which offers a slim, comfortable, round profile with user-configurable rails and rail covers. New handguard, fluted barrel and integral flash suppressor all remove weight from the front end of this carbine, improving its quick handling characteristics. Collapsible black synthetic stock. Folding battlesights. Manganese Phosphate hard coat anodized finish. 1:9 inch right hand twist. 6 grooves.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value 1 437 USD		Gas operated		Rounds 30 Barrel 16,12" Weight Lenght	
USA - Ruger (Sturm, Ruger & Co)	Ruger SR556E Essential (SR-556E)	Carbine	5,56 NATO (5,56x45. .223 Remington), SR-556E Essentials Autoloading Rifle. Features a round, lightweight adaptable handguard with a full-length Picatinny rail at the 12:00 position and an A2-style pistol grip with finger grooves. Two-stage piston with four-position adjustable regulator. Cold hammer-forged 41V45 barrel with black anodized finish and no sights. Six-position telescoping M-4 style buttstock. One 30-round Magpul PMAG magazine and a nickel-Teflon coated transfer rod. Includes soft sided case. USA - Russel Turner	Turner Carbine (First version)	Assault rifle	.30 Carbine (7,62x33. .30 US M 1 Carbine. .30 Self-Loading) Russell Turner was a private inventor from Pennsylvania, and submitted this prototype to the Light Rifle trials in August of 1941. It was an unusual entrant in its use of a metal forearm and tubular metal stock (both of which were deemed unacceptable by the test committee). It was a gas operated design with a 3-position adjustable gas regulator and a piston running along the right side of the barrel. Full auto fire was enabled by turning the hex-head socket screw behind the trigger.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds 5 Barrel 15,5" Weight 4,5 lbs Lenght 33,9"	

USA - Russel Turner	Turner Carbine (Second version)	Carbine	.30 Carbine (7,62x33. .30 US M 1 Carbine. .30 Self-Loading) Turner did submit a second variant of his carbine in September 1941 (less than a month after testing of his first design). The new gun had a tradition wooden stock and foreend, no longer had a full-auto setting, and had been modified to prevent some of the problems of the first design. However, it was clearly a very hasty rework. The second design was a small improvement, rated “fair” in functioning (up from “poor”), but it was expected that the problems could be worked out.	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

USA - Savage Arms	Savage Lewis	Light machine gun	.30-06 Springfield (7,62x63, .30 Browning) The Lewis Gun or Lewis Automatic Machine Rifle was invented by U.S. Army Colonel Isaac Newton Lewis in 1911, based on initial work by Samuel Maclean. Despite its origins, the Lewis Gun was not instantly adopted by the Americans. This may have been due to a clash of personalities with the U.S. Army's Chief of Ordnance. It had a cyclic rate of approximately 550 rounds per minute.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

USA - Special Weapons	Special Weapons SP10 (SP-10)	Carbine	9x19 Parabellum (9 mm NATO, Para, Luger, Beretta, Suomi) The <i>SP10</i> fires from a closed and locked bolt. Roller delayed blowback - locked-bolt system, side folding stock, and can be fitted with an illuminating flashlight integral to the forward handguard. This is a semi auto version of the new MP10 submachinegun. This weapons is based on the MP5 technology but all the flaws with the MP5 have been removed. The thin sheet metal receiver is replaced with a steel insert molded composite reciever that is 10 times more impact resistant.	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
Value	950 USD	Blowback operated		Rounds 30 Barrel 16" Weight 5,2" Lenght 35"

USA - Spikes Tactical	Spikes Battleworn PHU Joker Rifle	Carbine	5,56 NATO (5,56x45, .223 Remington) The PHU rifles are the result of collaboration with Pipe Hitters Union attitude apparel. PHU was founded in Baghdad in 2004 by American security contractors who found themselves at war without the benefit of formal weapon supply. This forced them to build their own rifles with little bureaucracy and oversight. This created an era of innovation and an evolutionary jump in development of AR products. USA - Spikes Tactical	Spikes Ultimate Assassin V2	Carbine	5,56 NATO (5,56x45, .223 Remington) The Ultimate Assassin V2 has a few upgrades from our original Ultimate Assassin which was designed with input from our 3 gun team and other competitors. Minimal recoil, target transition at depth, and weight are their primary concerns. The Ultimate Assassin V2 is the billet counterpart to the Black Assassin V2 and has been recently upgraded with a crisp clean trigger and our R2 muzzle break. The R2 muzzle break is light, and significantly reduces muzzle lift and recoil. USA - Springfield and Winchester	Springfield M 1C (M 1E7)	Carbine	.30-06 Springfield (7,62x63, .300 Browning) The M1 was adopted as the standard issue rifle in 1932 and started to enter service in 1936, which led to constant refinement of the rifle. This precluded any work on a sniper version of the M1, but as the war broke out, there was a large demand for scoped rifles, and this lead to the adoption of the M1903A4 and also the authorization to produce a sniper version of the M1. USA - Springfield and Winchester	Springfield M 1D (M 1E8)	Rifle	.30-06 Springfield (7,62x63, .300 Browning) The M1 was adopted as the standard issue rifle in 1932 and started to enter service in 1936, which led to constant refinement of the rifle. This precluded any work on a sniper version of the M1, but as the war broke out, there was a large demand for scoped rifles, and this lead to the adoption of the M1903A4 and also the authorization to produce a sniper version of the M1. USA - Springfield Armory	Springfield T20E2 (T-20E2)	Assault rifle	.30-06 NATO Springfield (7,62x63. <u>.30</u> Browning, Springfield) T-20E2 was to be a selective-fire variant of the M-1 Garand battle rifle. Springfield Armory first responded with the T-20 but it was essentially a technical mess that had mechanical problems as well as excessive recoil, extreme heating of the barrel and later, a muzzle brake which prevented the use of a bayonet or rifle grenade launcher attachment. It was not accepted by the War Department, but it did serve to teach Springfield some valuable lessons of how not to go about the conversion. USA - Springfield Armory	Springfield T44 UMG (T-44)	Machine gun	.30-06 NATO Springfield (7,62x63. <u>.30</u> Browning, Springfield) The most notable feature of the T44 was the replacement of the belt feed module, which was located on the left side of the receiver (with the belt passing vertically from bottom to top) instead of the more common top position with a lateral belt movement. The development of the T44 was stopped in 1948, when it was decided to concentrate on a new, shortened 7.62mm T65 cartridge. USA - Springfield, Winchester, Harrington	Springfield Mod. US M 14E2 (M 14A1)	Assault rifle	7,62 mm NATO (7,62x51, .308 Winchester) The M14E2, later redesignated the M14A1, was the replacement for the ill-fated heavy barrel M15 rifle. Both were intended to fill the role of the BAR in providing automatic fire in support of M14 rifles. The M15 program was cancelled before any rifles were built, and the M14E2 that replaced it was simply an M14 with a pistol grip stock, bipod, forward grip, and bipod	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

USA - Thompson, Auto-Ordnance	Thompson M 1923	Assault rifle	.45 Auto Remington - Thompson The Model 1923 was introduced to potentially expand the Auto-Ordnance product line and was demonstrated for the U.S. Army. It fired the more powerful .45 Remington-Thompson cartridge from a 14-inch (35.5 cm) barrel, with greater range than the .45 ACP. It introduced a horizontal forearm, sling, bipod and bayonet lug. The Army did not give the Model of 1923 much consideration, so it was not adopted. USA - TRW (Thompson-Ramo-Wooldridge)	TRW LMR (Low Maintenance Rifle)	Assault rifle	5,56 NATO (5,56x45, .223 Remington) Long-stroke gas piston, located at the right side of the barrel. Gas port is located near the muzzle, and gas block serves as a base for front sight. The barrel is enclosed in tubular metallic handguard with oval cooling slots. TRW fired only in full automatic mode, and from open bolt. Locking is achieved by a pair of rollers, that engage respective cuts in the barrel extension when in battery. USA - Vigilance Rifles	Vigilance VR1 PSR (Precision Sniper Rifle)	Rifle	.338 Lapua Magnum, .408 CheyTac (10,4x80. Cheyenne Tactical), .505 Gibbs Magnum This rifle is one of the very few semi-automatic rifles produced to fire specially designed powerful long range ammunition such as .338 Lapua Magnum (8.7x69mm) and .408 Chey-tac (10.3x77mm). These rounds generate muzzle energies ranging from about 6,500 Joules (.338LM) to 11,300 Joules (.408CT), and that is about 2 to 3 times more energy than is generated by the most common 7.62x51 NATO / .308 Win round,	B4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Value 300 USD		Blowback operated		Rounds 14 Barrel 22"	Weight 5,43 lbs Lenght 40,5"
USA - White Automatic Gun Corp.	White .276 rifle	Carbine	.276 Pedersen T2 (7x51,5. <u>.276</u> T2, Pedersen M 29) Handiness – the rifle handles well, recoil is negligible, it is light, comfortable to fire and is free from awkward projections. Strength – the method of securing the action to the stock is not robust; it is thought that damage would readily be caused by bayonet fighting. Accuracy – poor. This may be due to ammunition or the condition of the barrel, which is understood to have fired a large number of rounds.	B4	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds 10 Barrel 20"	Weight 8 lbs 11 1/2 oz Lenght 39,2"
USA - White Automatic Gun Corp.	White .30 LMG	Light machine gun	.303 British (7,7x56 R. .303 Lee-Enfield Mk. 7) The gas unit is similar in principle and was the forerunner to that of the White .276-inch self-loading rifle. It is obviously an experimental weapon, it is too heavy for a rifle and falls far short of modern light machine gun requirements. The locking system is simple but it is thought that certain parts would not stand up to hard wear.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value		Gas operated		Rounds 20 Barrel 23,6"	Weight 12 lbs 1/2 oz Lenght 45,3"
USA - White Automatic Gun Corp.	White .30 Rifle	Rifle	.30 Carbine (7,62x33. .30 US M 1 Carbine. .30 Self-Loading) Handiness – the rifle handles well, is not unduly heavy, and is free from awkward projections. It is unsatisfactory in the following respect: the firer's trigger finger is subjected to a considerable shock which very quickly causes the finger to become numb. Strength – the method of retaining the body and barrel in the stock is unsatisfactory. The spring clip near the muzzle is weak and would readily become detached, and the 'T' bearing at the front of the body is not substantial.	B4	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

USA - Wilkinson Arms	Wilkinson Terry	Assault rifle	9x19 Parabellum (9 mm NATO, Para, Luger, Beretta, Suomi) This is a very rare carbine. 9mm luger, blowback design, uses a 31 round magazine. Wilkinson Arms started out in Covina California before moving to Parma Idaho. Wilkinson Terry was a carbine from probably 15 years ago or better. Looked like a cross between a Uzi, m3 grease gun, and a 1917 Savage pistol. Used a lot of light weight materials, used a slightly different Browning HP magazine.	A2	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>

USA - Winchester	Winchester SPIW (Special Purpose Individual Weapon)	Assault rifle	5,6x43,7 US XPL SPIW XM144 Flechette) Winchester's "soft recoil" SPIW rifle design was deemed too complicated. The barrel reciprocated within the stock housing, but the receiver length was too short to allow a three round burst to be completed prior to the action bottoming out within the receiver. The varying position of the barrel during the feed cycle was suspected as a cause of malfunctions. In contrast, Winchester's blow-forward grenade launcher was very popular due to its relatively compact dimensions	A2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

USSR	Shpagin M 1944	Assault rifle	7,62x39 Kalashnikov (.30 Russian) Experimental Shpagin Model 1944 assault rifle, a competitor in the assault rifle trials, bears striking resemblance to his PPSH-41 submachine gun. Shpagin also entered an experimental assault rifle in 1944 to compete in the military trials using the new 7.62x39 cartridge. It lost out to the Sudaev AS -44. After a few more years of field evaluations, the Kalashnikov designed AK-47 eventually won the assault rifle trials, and was officially adopted in 1949. USSR	Simonov SKS Sniper	Carbine	7,62x39 Kalashnikov (.30 Russian) SKS sniper carbine was created in 1944 by constructor Simonov as a main Soviet Army sniper rifle to change Mosin's three line rifle and quiet unreliable automatic Tokarev's rifle SVT. It's preparation for serial production lasted till 1949. SKS is quiet easy in usage. Good weapons balance make it easy to aim and to shoot. A bit longer than AK-47 barrels length gives better fire accuracy. USSR - Tula Weapon Plant	Maxim - Tokarev MT 1925	Light machine gun	7,62 mm Nagant (7,62x54 R, 7,62 Mosin -Nagant, 7,62 Russian), Maxim-Tokarev (M-T) light machine gun: This was an interim “light machine gun” modification, built along the lines of the German IMG 08/18 light machine gun. Water jacket was discarded and replaced by thin perforated steel jacket, and the barrel was shortened and lightened. Barrel could be changed more or less quickly in the field. Spade grips were replaced with rifle-type stock; thumb-trigger was replaced by rifle-type trigger. Folding bipod was attached to the barrel jacket. USSR - Tula Weapon Plant	Tokarev SVT38 SVT 1938	Rifle	7,62 mm Nagant (7,62x54 R, 7,62 Mosin -Nagant, 7,62 Russian), The SVT-38 (Samozyadnaya Vintovka Tokareva - Tokarev Self-loading rifle) was originally adopted in the 1938 after more than 20 years of the research and development, done by famous Russian arms designer Fedor Tokarev. It was not a first Soviet semi-automatic rifle	A7	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/>
Value	6 000 USD	Gas operated		Rounds 15 Barrel 625 Weight 3,85 Lenght 1226	
USSR - Tula Weapon Plant	Tokarev SVT40 Sniper (SVT-40, M 1940, 1941)	Rifle	7,62 mm Nagant (7,62x54 R, 7,62 Mosin -Nagant, 7,62 Russian), 7,62x52 R SVT-40 is a gas operated, magazine fed self-loading rifle. It uses a short piston stroke gas action, located above the barrel. The interesting feature of the SVT is that the gas block, along with front sight base and a muzzle brake, were produced as a single barrel extension unit. This greatly simplified the manufacture of the barrel, but the barrel extension itself unit was quite complicated to make. Gas chamber has 5 positions gas regulator to adjust the system for any conditions. Vjetnam	Type 68 (AKMC)	Assault rifle	7,62 mm Kalashnikov (7,62x39) US - with reduced speed The Type 68 is a gas operated, selective fire veapon. It shares the stock design and receiver outline with SKS, but instead of tilting bolt uses AK-47-type rotating bolt action. The gas system is somewhat original and not similar to SKS nor to AK-47, and has dual positions gas regulator. This rifle is fed from detachable box magazines, that are similar to Ak-47 magazines. Yugoslavia	Schwarzlose M 8M	Machine gun	8 mm Mauser (7,92 mm Mauser, 7,9x57 JS, 8x57 IS, 7,9x57 JS) The Schwarzlose uses a toggle lock that looks at a glance similar to a Maxim or Luger lock, except that this toggle does not act to lock the bolt. Instead, the toggle must be broken and folded before the bolt can travel rearward, thus delaying it for a moment. This delay is long enough to allow chamber pressure to drop to a safe level (assuming everything is done right). Yugoslavia	Yugo CZ RPK M 72 (Kalashnikov)	Light machine gun	7,62 mm Kalashnikov (7,62x39) The RPK (Ruchnoy Pulemyot Kalashnikova, Russian: "Kalashnikov hand-held machine gun") is a 7.62 mm light machine gun of Soviet design, developed by Mikhail Kalashnikov in the late 1950s, parallel with the AKM assault rifle. It was created as part of a program designed to standardize the small arms inventory of the Red Army, where it replaced the 7.62 mm RPD light machine gun. Presently the RPK continues to be used by the armed forces of countries of the former Soviet Union and certain African and Asian nations.
